

# iCAROS phase 1 Complex RD Energy Bid submission

Implementation guide

06/05/24 | Training SA

# Agenda for today

Recap of last session

Specificities for RD bids

Complex bidding for RD Energy bid submission:

- How to link bids within a same QH: Exclusive groups
- How to link bids across QH: Conditional linking

Examples:

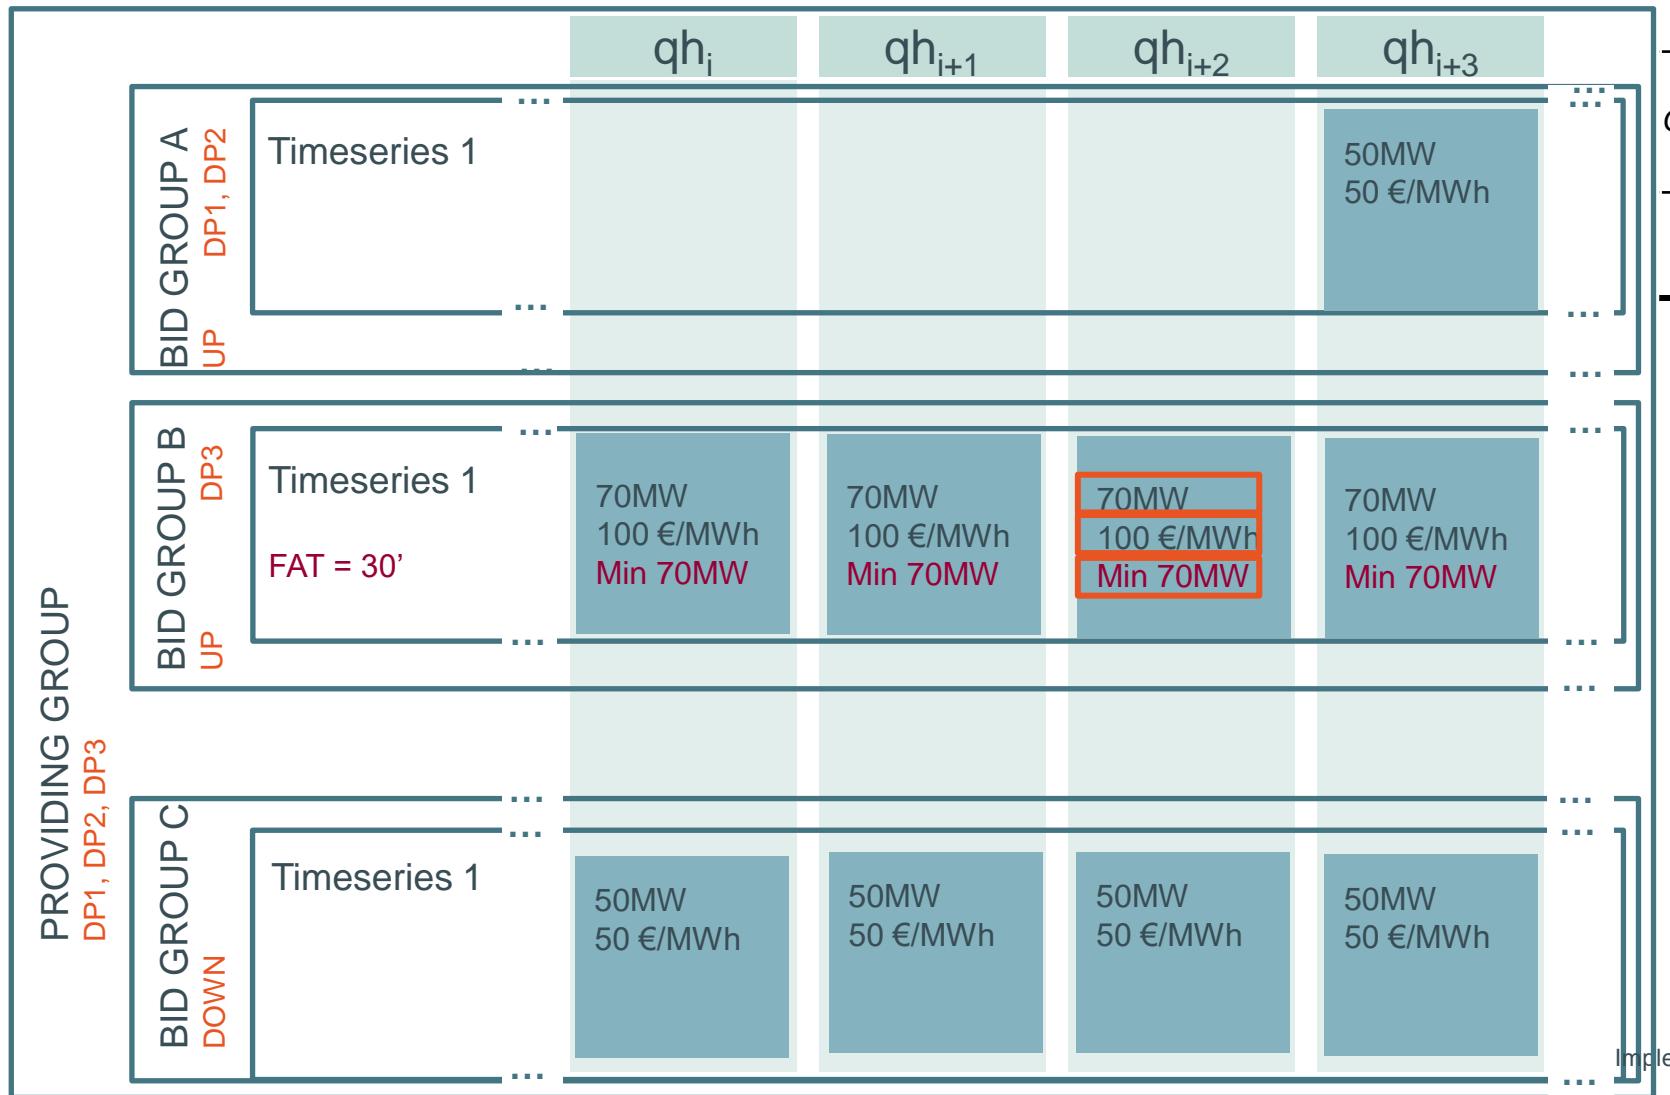

- Complex biddings
- Full Activation Time
- Minimum Activation Time

Energy bid characteristics	
Local design	ID List of Delivery points
Direction	Bid price
Bid price	Bid volume
Bid volume	Minimum bid volume
Minimum bid volume	Maximum activation time
Maximum activation time	Quarter-hour linking (conditional links)
Quarter-hour linking (conditional links)	Part of exclusive group
Part of exclusive group	Part of parent/child relation
Complex Bidding	
Part of parent/child relation	
Redispatching only	Full activation time
	Minimum activation time

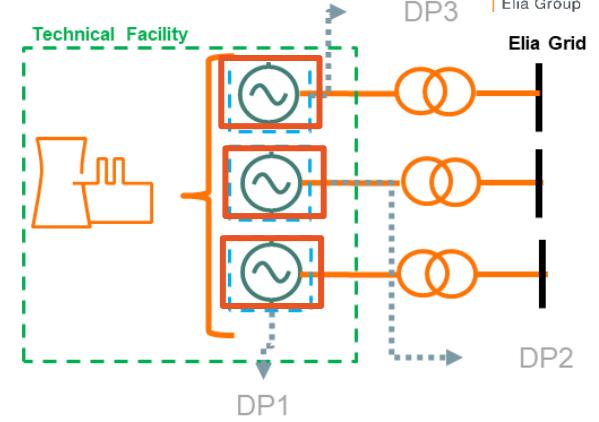

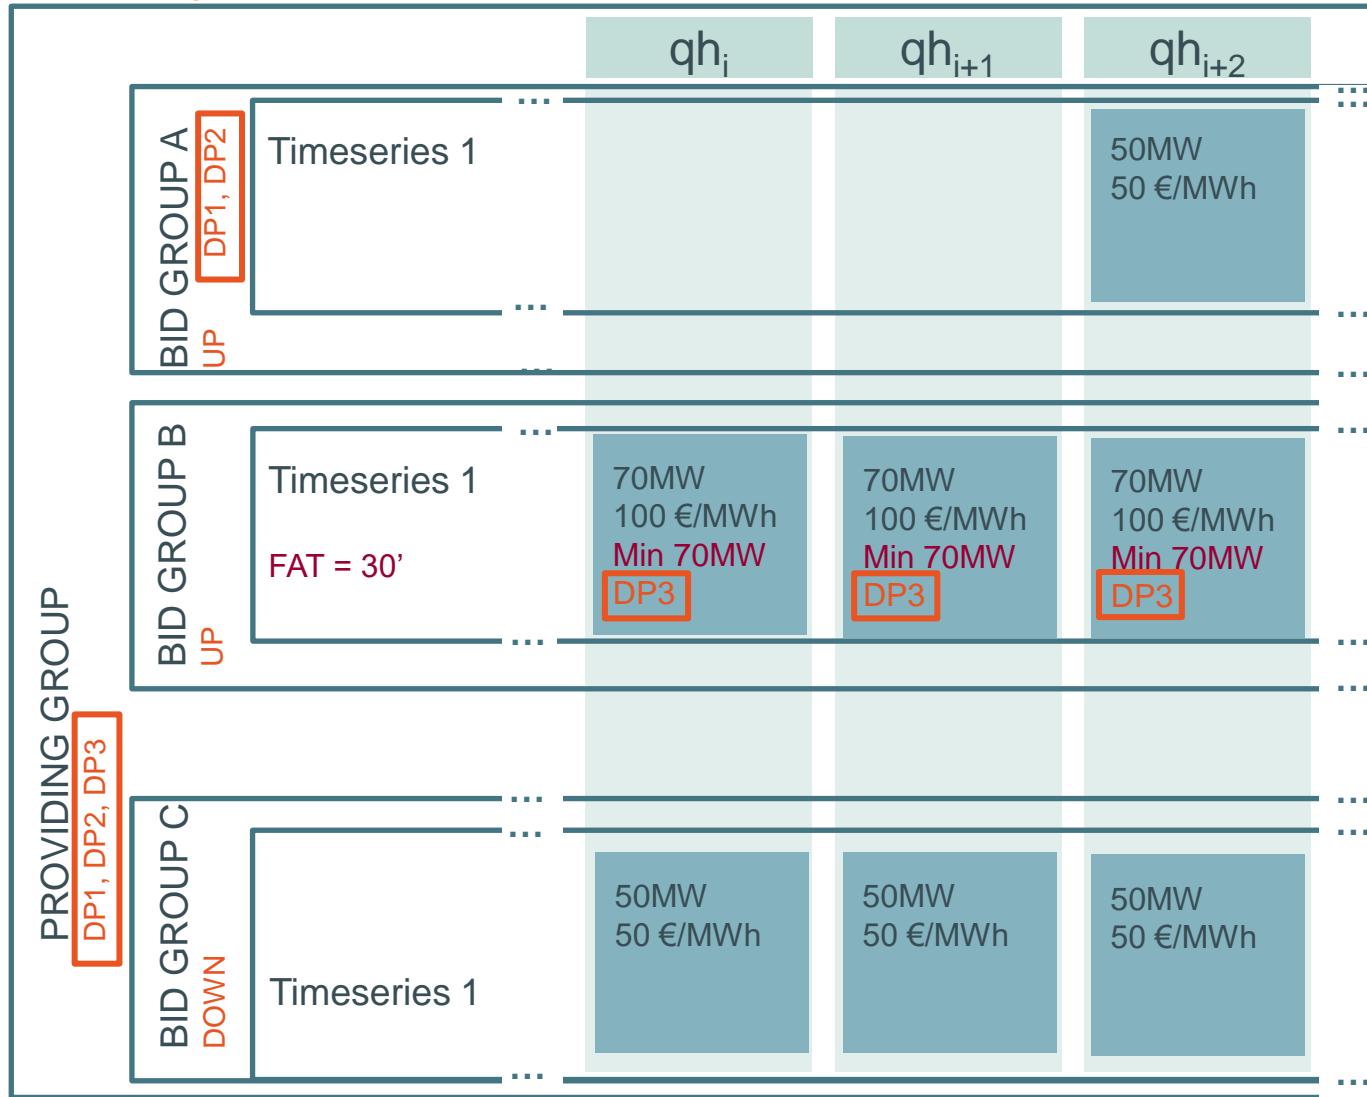

## BIDDING STRUCTURE

**Price, volume and minimum volume are defined at bid level**

## BIDDING STRUCTURE

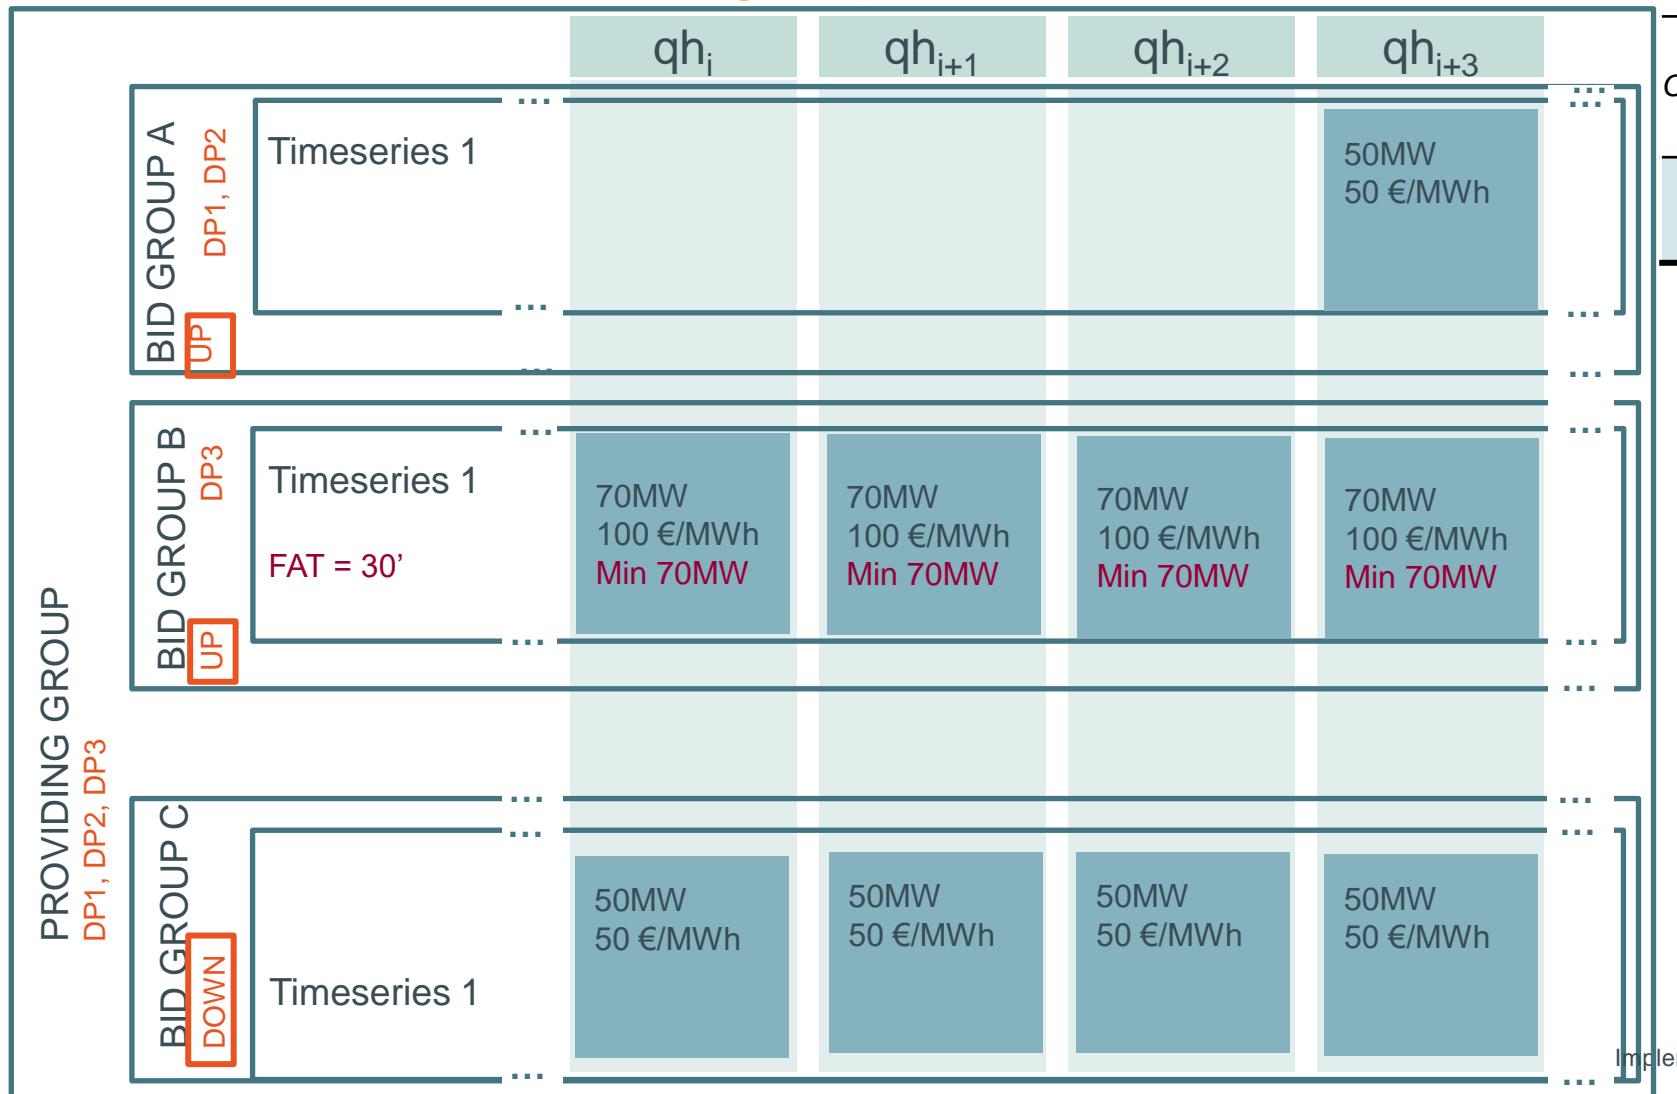

*Delivery Points can be defined at multiple levels*

- Providing group = Technical Facility
- Bid group = Operating mode

# BIDDING STRUCTURE

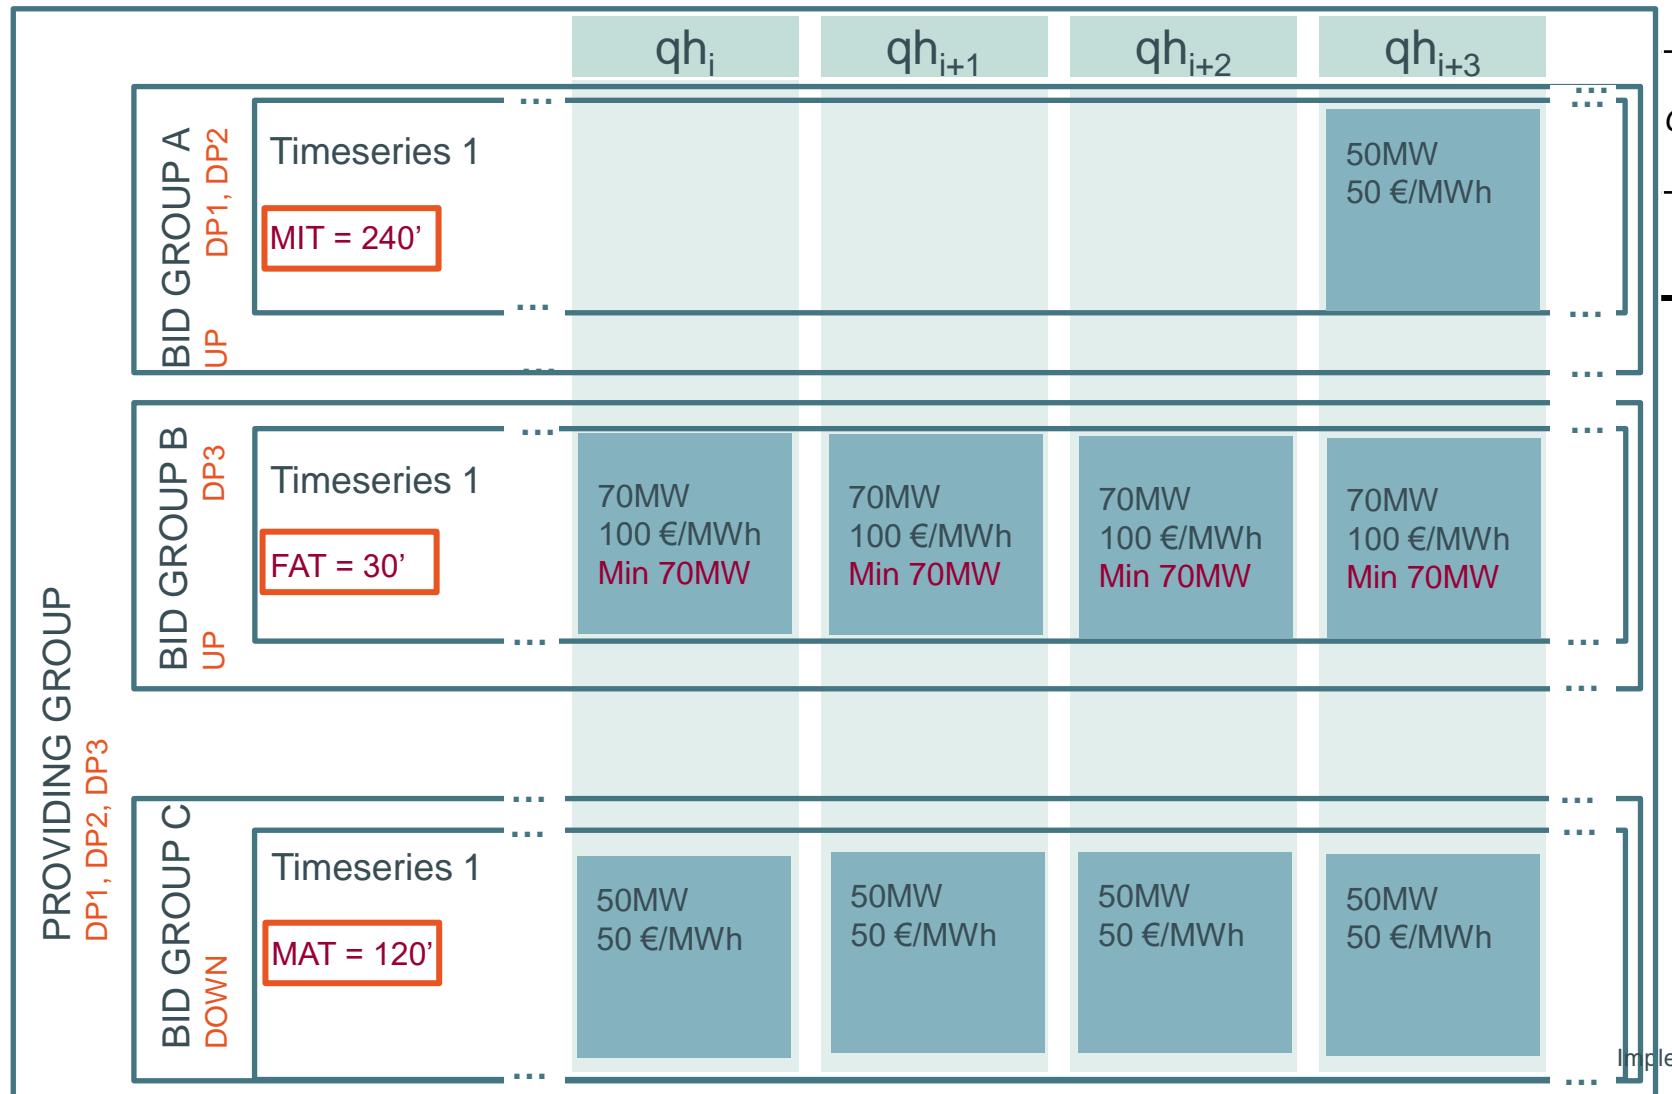

**Direction is defined at bid group level**

Energy bid characteristics	
Local design	ID
	List of Delivery points
	Direction
	Elia Group
	Bid price
	Bid volume
	Minimum bid volume
	Maximum activation time
Complexe Bidding	Quarter-hour linking (conditional links)
	Part of exclusive group
	Part of parent/child relation
Redispatching only	Full activation time
	Minimum activation time

# BIDDING STRUCTURE

**FAT, MAT\* and MIT are defined at Timeseries level**

Energy bid characteristics	
Local design	ID List of Delivery points
	Direction
	Bid price
	Bid volume
	Minimum bid volume
	Maximum activation time
Complexe Bidding	Quarter-hour linking (conditional links)
	Part of exclusive group
	Part of parent/child relation
Redispatching only	Full activation time Minimum activation time

# GOAL OF THIS SESSION

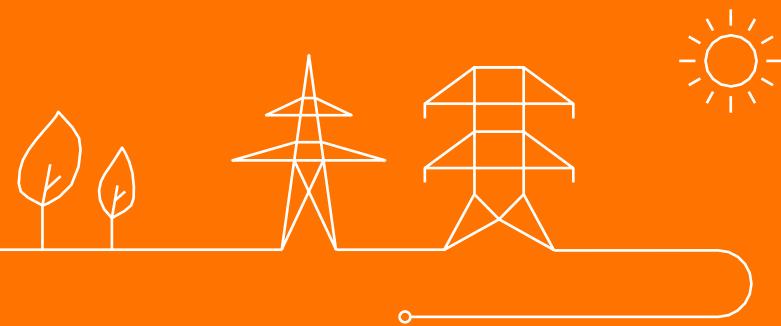

Energy bid characteristics	
Local design	ID
	List of Delivery points
	Direction
	Bid price
	Bid volume
	Minimum bid volume
	Maximum activation time
<b>Complexe Bidding</b>	<b>Quarter-hour linking (conditional links)</b>
	<b>Part of exclusive group</b>
	<b>Part of parent/child relation</b>
<b>Redispatching only</b>	<b>Full activation time</b>
	<b>Minimum activation time</b>

To explain the usage of complex bidding (conditional links, exclusive groups and combination...) to offer flexibility of DPs in different operating modes for RD

# SPECIFICITIES FOR RD BIDS

FAT

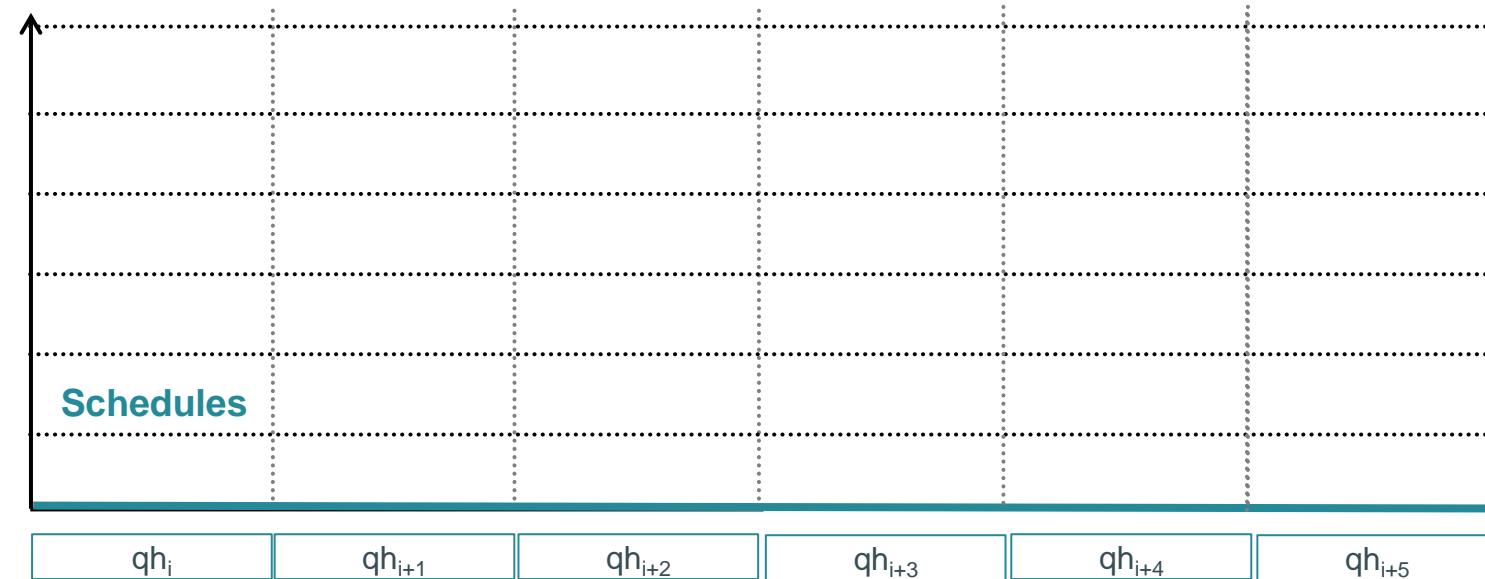

# FULL ACTIVATION TIME

## *Example – initial situation*

PROVIDING GROUP	DP1	BID GROUP A	qh <sub>i</sub>	qh <sub>i+1</sub>	qh <sub>i+2</sub>	qh <sub>i+3</sub>	qh <sub>i+4</sub>	qh <sub>i+5</sub>
		Timeseries 1 FAT = 45'		100MW 100 €/MWh Min 70MW				

### Initial situation (before activation)

- 1 Bid Groups with
  - DP1 initially not running (schedule = 0 MW)
  - FAT = 45 min
- All bids in these Bid Groups are available

### Legend:

Bid available for selection and activation

Bid selected / activated

Bid unavailable for selection and activation

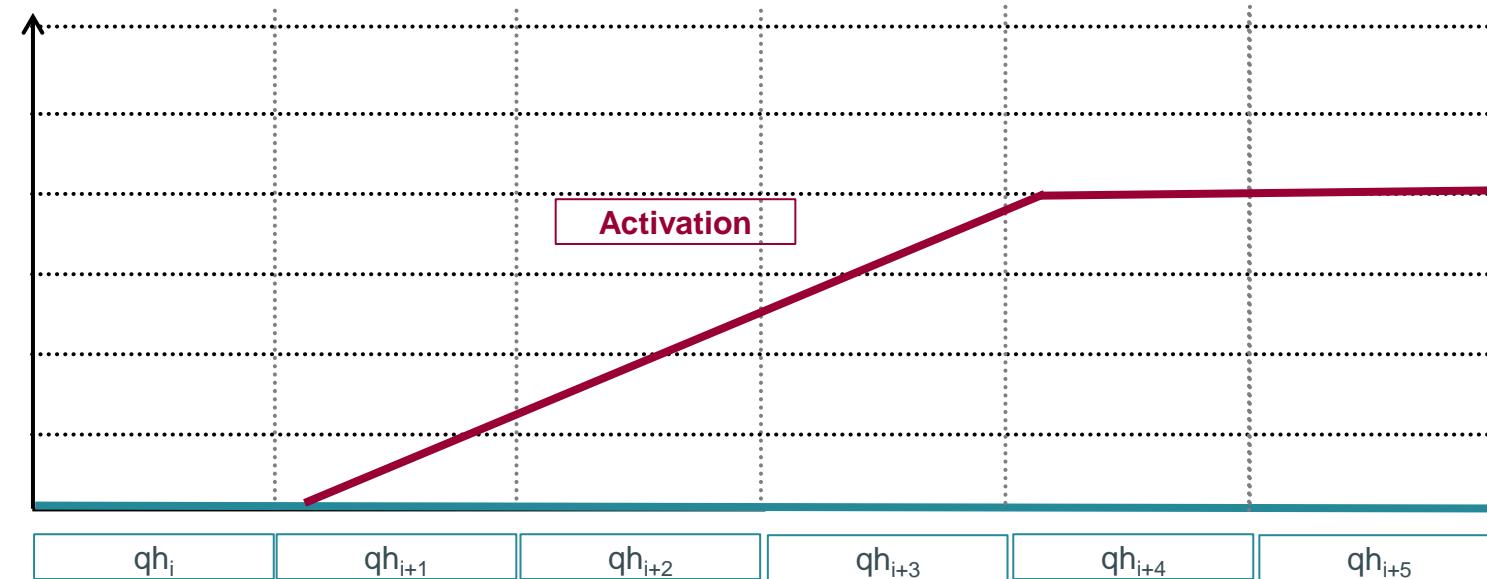

# FULL ACTIVATION TIME

## *Example – final situation*

PROVIDING GROUP	$qh_i$	$qh_{i+1}$	$qh_{i+2}$	$qh_{i+3}$	$qh_{i+4}$	$qh_{i+5}$
BID GROUP A DP1 UP	Timeseries 1  FAT = 45'	100MW 100 €/MWh Min 70MW				

### Final situation (at activation)

- Elia activates 100 MW from  $qh_{i+4}$  to  $qh_{i+10}$
- Ramp-up start 45' (=FAT) before  $qh_{i+10}$
- 100 MW are reached in  $qh_{i+10}$

### Legend:

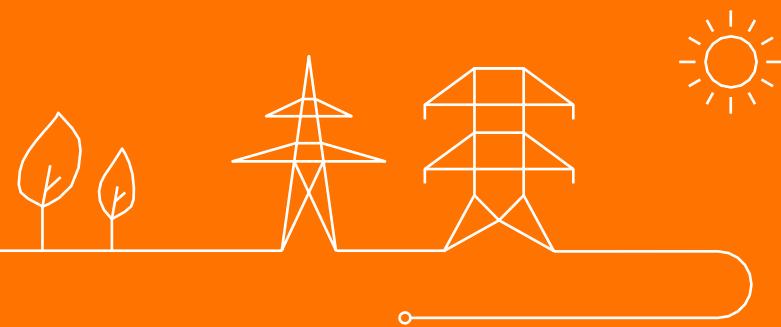

Bid available for selection and activation

Bid selected / activated

Bid unavailable for selection and activation

# HOW TO LINK BIDS WITHIN THE SAME QH

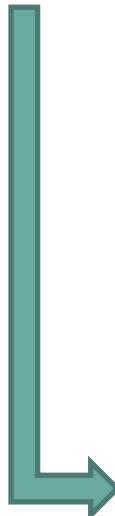

Exclusive groups & Parent-child relations

# HOW TO LINK BIDS WITHIN THE SAME QH

## *Exclusive groups & Parent-child relation*

### Simple bid

Simple bids can be linked **within the same quarter hour** to form **complex bids**

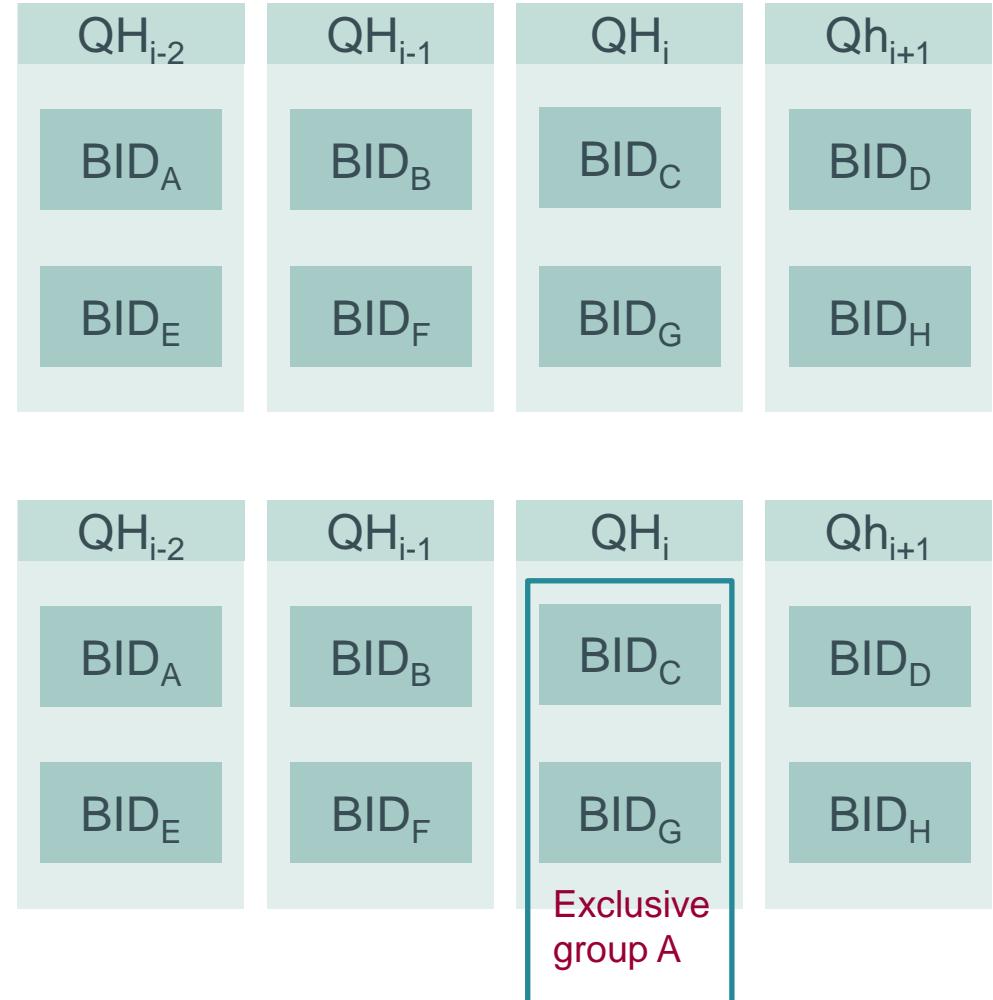

- Exclusive Group (=EG)

**Only one or none** of the bids in an exclusive group can be activated simultaneously

- Parent-child relation

The child cannot be activated if the parent has not been activated first

Bids cannot have both an exclusive bid identification and a parent-child identification

## EXCLUSIVE GROUPS

### Example 1/2

#### Initial situation (before activation)

- 3 Bid Groups with
  - same DP1
  - different MAT
  - Same Exclusive Group
- All bids in these Bid Groups are available

Only 1 bid per qh in this Exclusive Group can be activated

#### Legend:

Bid available for selection and activation

Bid unavailable for selection and activation

		qh <sub>i</sub>	qh <sub>i+1</sub>	qh <sub>i+5</sub>	qh <sub>i+6</sub>	
PROVIDING GROUP	BID GROUP	UP				
		DP1	DP1	DP1	DP1	
	BID GROUP A	Timeseries 1  MAT = 60' Exclusive Group DP1	200MW 50 €/MWh	50MW 50 €/MWh	50MW 50 €/MWh	50MW 50 €/MWh
	BID GROUP B	Timeseries 1  MAT = 120' Exclusive Group DP1	100MW 150 €/MWh	100MW 150 €/MWh	100MW 150 €/MWh	100MW 150 €/MWh
	BID GROUP C	Timeseries 1  MAT = 240' Exclusive Group DP1	50MW 250 €/MWh	50MW 250 €/MWh	50MW 250 €/MWh	50MW 250 €/MWh

## EXCLUSIVE GROUPS

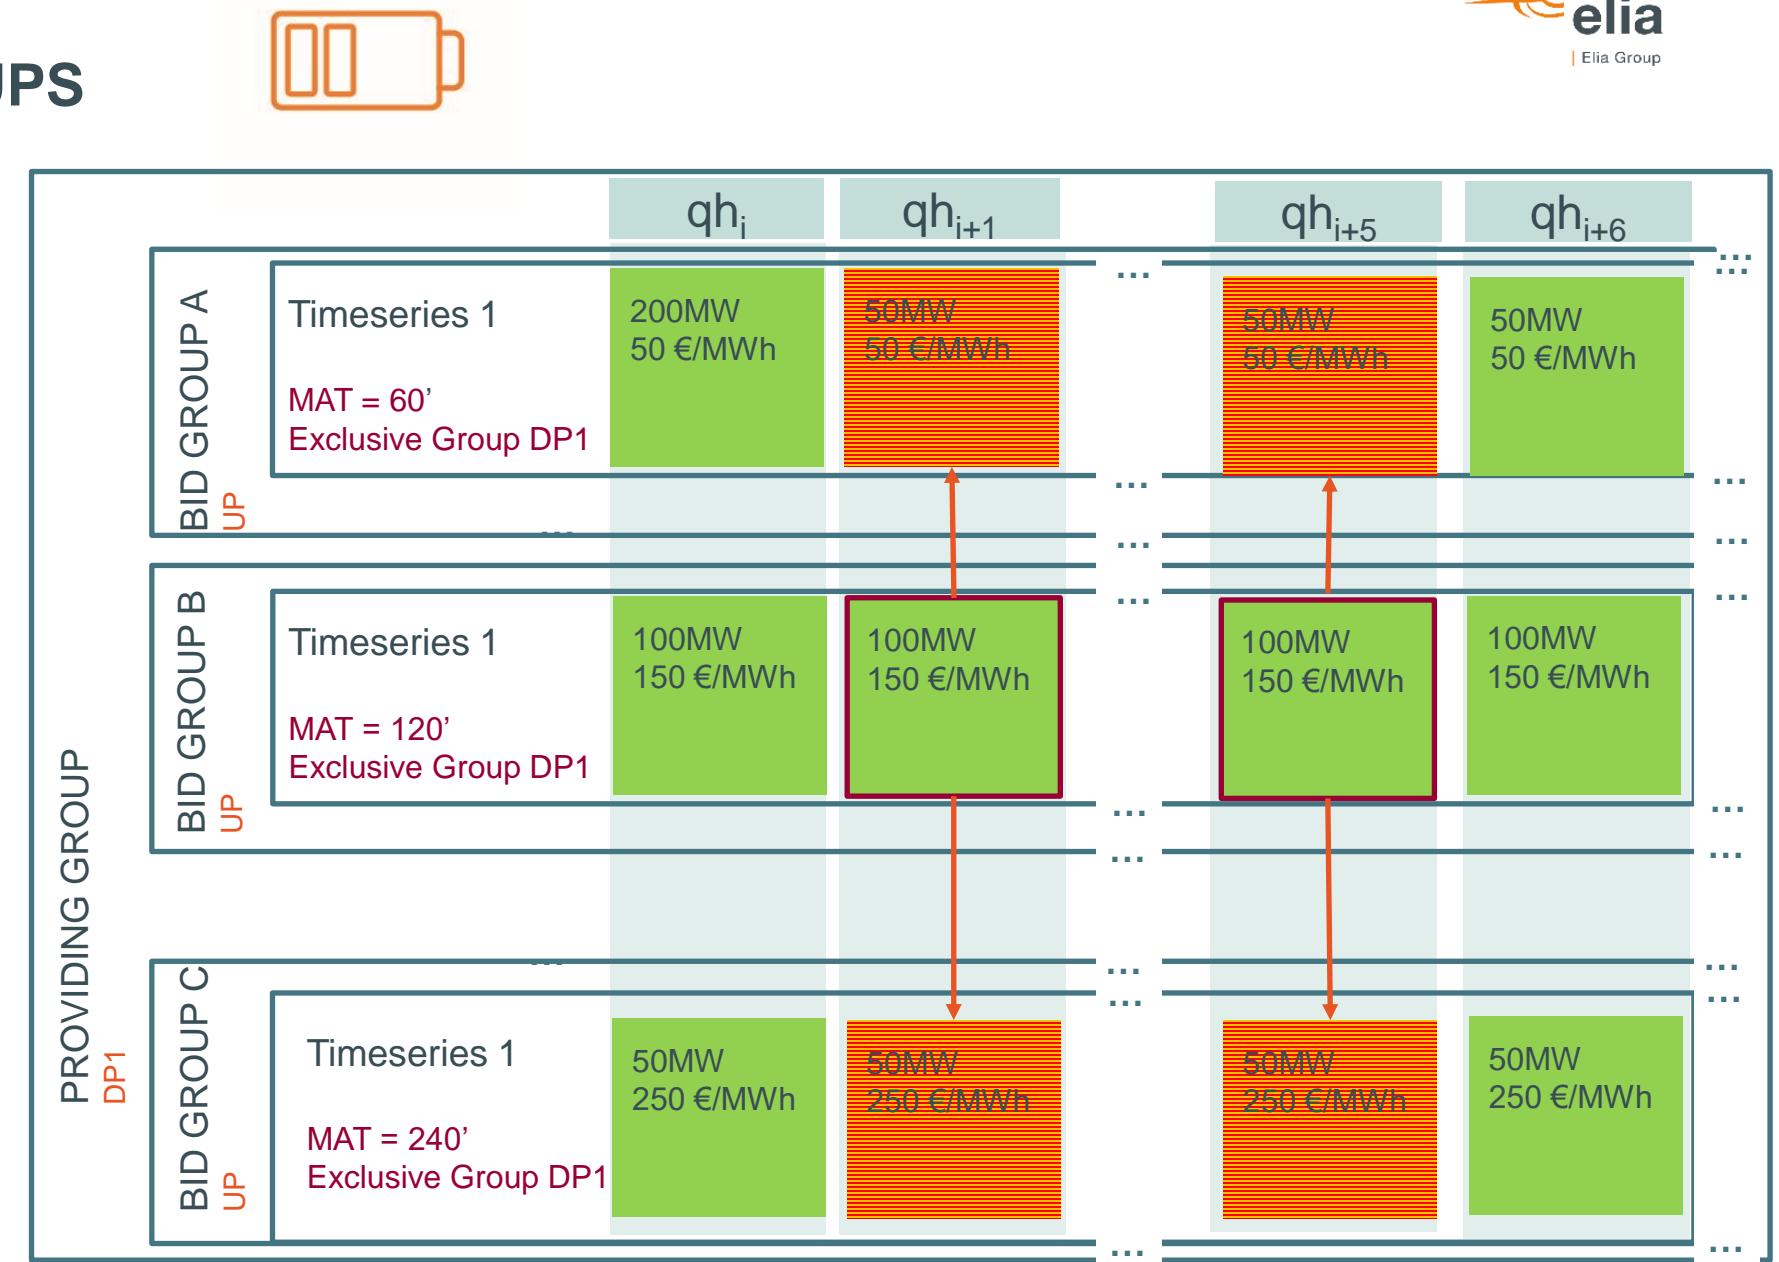

### Example 2/2

#### Final situation (at activation)

→ Bid Groups B is selected from  $qh_{i+1}$  to  $qh_{i+5}$

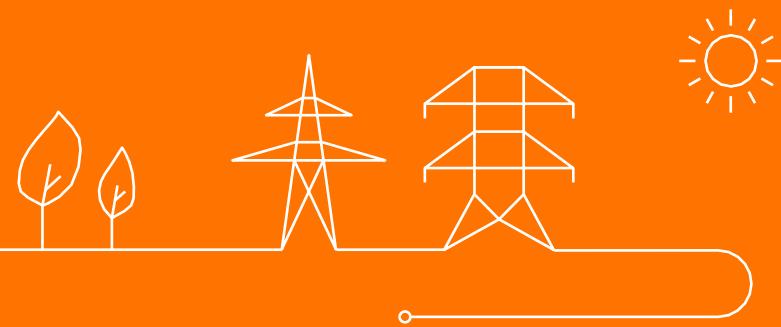

→ During this period all other bids in the Bid Groups of the Exclusive Group **cannot be selected**

Legend:	
Bid available for selection and activation	Bid unavailable for selection and activation
DP1	UP

# HOW TO LINK BIDS ACROSS QH

Conditional linking

# HOW TO LINK BIDS ACROSS QH

## Conditional linking\*

### Simple bid

Simple bids can be linked **through different quarter hour** to form **conditionally linked bids**

Maximum 6 links maximum 3 in QH-1 and 3 links in QH-2

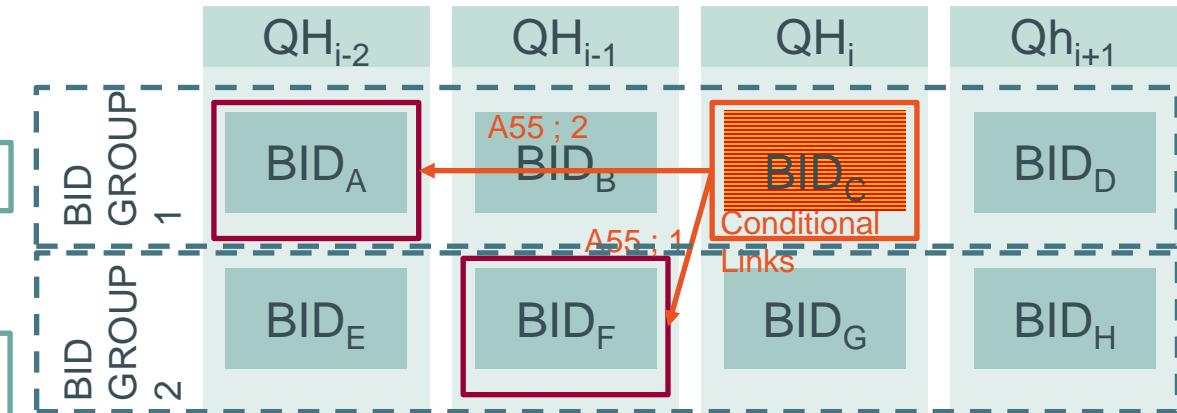

Different type of links:

**A55 link:** Bid initially **available**, becomes **unavailable** if linked bid activated

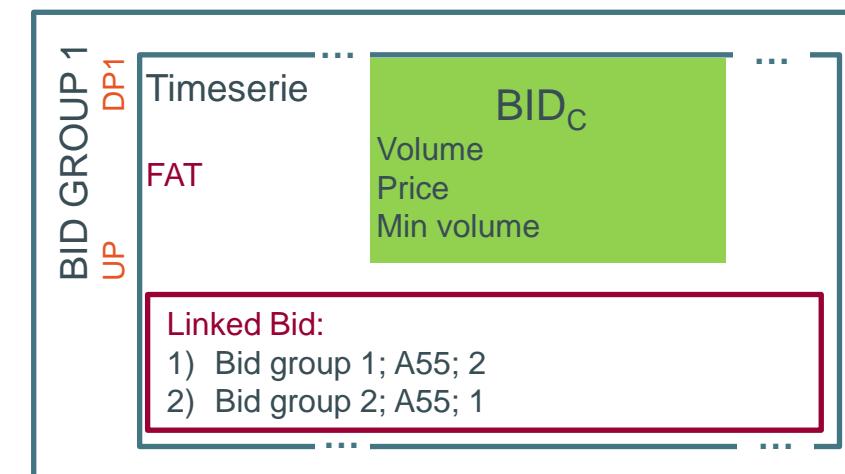

**A67 link:** Bid initially **unavailable**, becomes **available** if linked bid activated

**A56 link :** Bid initially **available**, becomes **unavailable** if linked bid not activated

**A68 link:** Bid initially **unavailable**, becomes **available** if linked bid not activated

Ex: Bid C is initially available and becomes unavailable  
 → if Bid Group 1 is activated in QH-2  
 → or if Bid Group 2 is activated in QH-1

\* Also called quarter-hour linking

## CONDITIONAL LINKING

### *Example of a start-up – initial situation*

DP is not running

**2 Bid Groups** to reflect start-ups:

- **Start-up** bids
  - Must be activated during 1 qh before one Continuous bid becomes available
  - Includes the start-up time in FAT, start-up price...
  - Is initially **available**
- **Continuous** bid
  - Includes all properties of a running DP (FAT, price...)
  - Is initially **unavailable**

		QH <sub>i</sub>	Qh <sub>i+1</sub>	Qh <sub>i+2</sub>
BID GROUP Start-up	Timeseries 1	Bid <sub>Startup, qhi</sub>	Bid <sub>Startup, qhi+1</sub>	Bid <sub>Startup, qhi+2</sub>
	Timeseries 1	Bid <sub>Continuous,qhi</sub>	Bid <sub>Continuous,qhi+1</sub>	Bid <sub>Continuous,qhi+2</sub>

#### Legend:

Bid  
**available** for  
selection and  
activation

Bid selected / activated

Bid  
**unavailable**  
for selection  
and activation

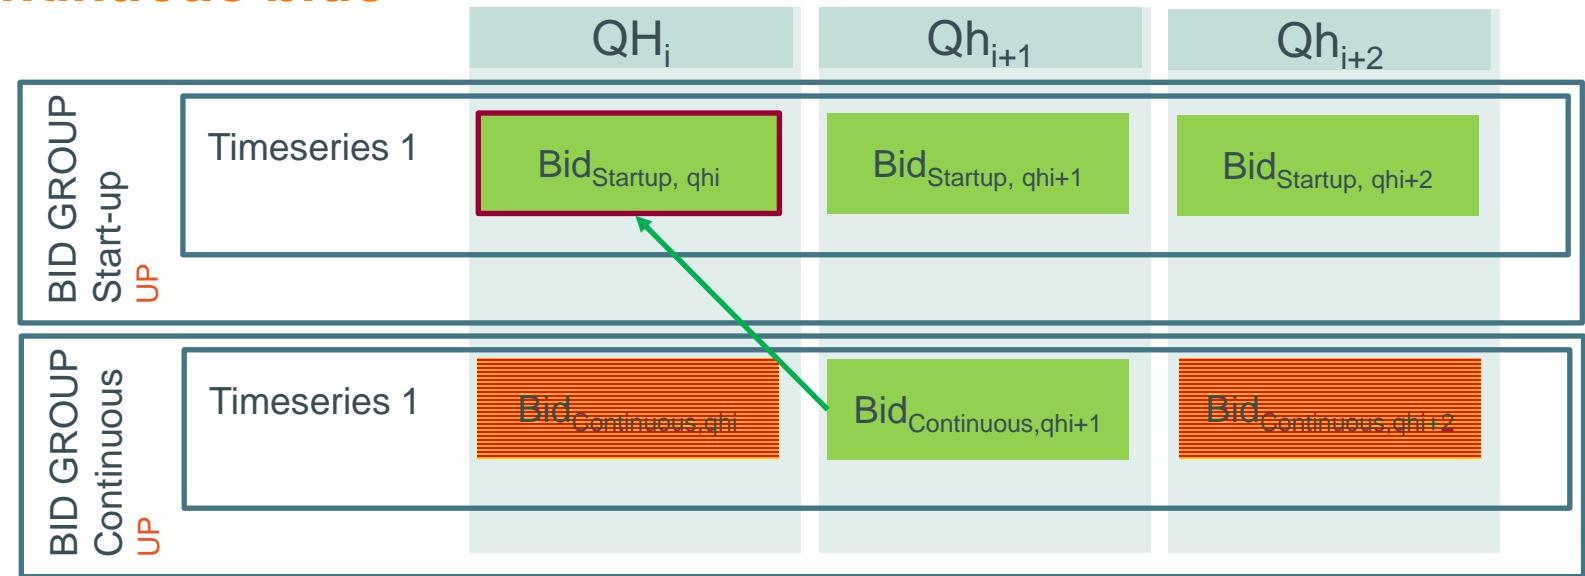

## CONDITIONAL LINKING

### *Example of a start-up – continuous bids*

DP is not running

**2 Bid Groups** to reflect start-ups:

- Start-up bids
  - initially **available**
- **Continuous** bid is
  - initially **unavailable**
  - Becomes available if  $\text{Bid}_{\text{Startup}, qh-1}$  is activated: A67 link →

#### Legend:

Bid  
**available** for  
selection and  
activation

Bid selected  
**/ activated**

Bid  
**unavailable**  
for selection  
and activation

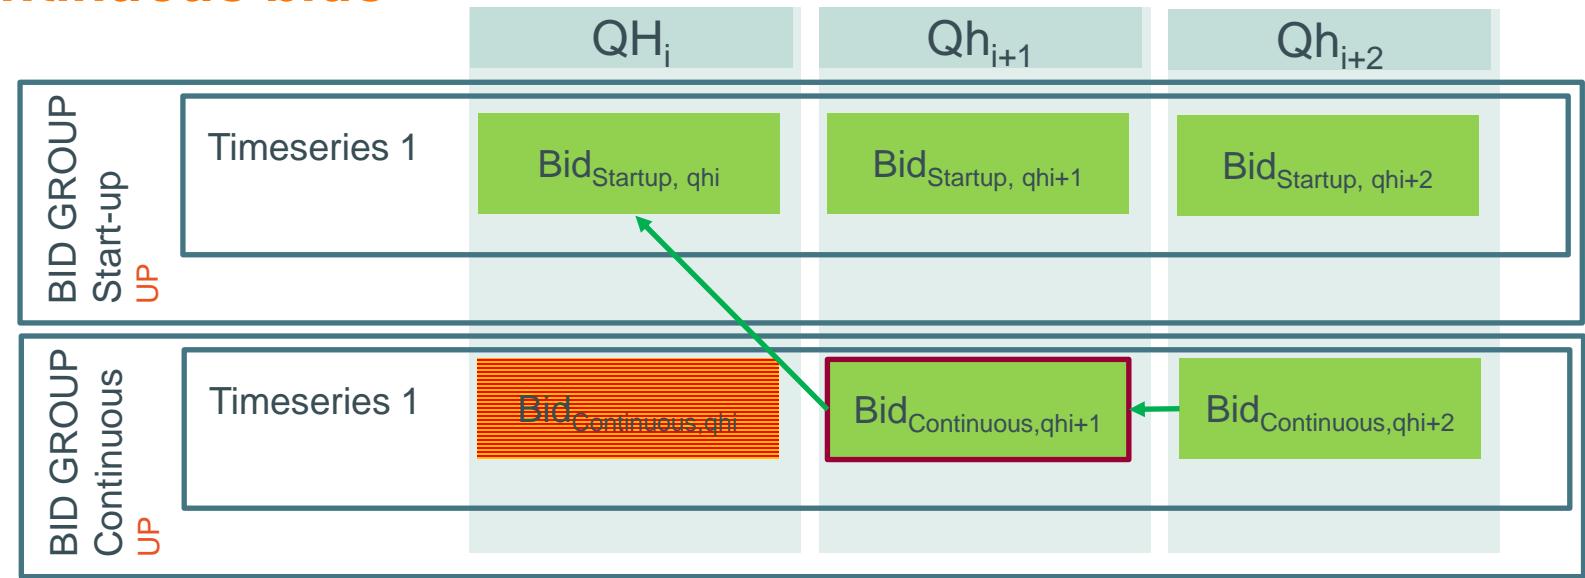

## CONDITIONAL LINKING

### *Example of a start-up – continuous bids*

DP is not running

**2 Bid Groups** to reflect start-ups:

- Start-up bids
  - initially **available**
- **Continuous** bid is
  - initially **unavailable**
  - Becomes available if  $\text{Bid}_{\text{Startup}, qh-1}$  is activated: **A67 link**
  - Or Becomes available if  $\text{Bid}_{\text{Continuous}, qh-1}$  is activated: **A67 link**

#### Legend:

Bid  
**available** for  
selection and  
activation

Bid selected / activated

Bid  
**unavailable**  
for selection  
and activation

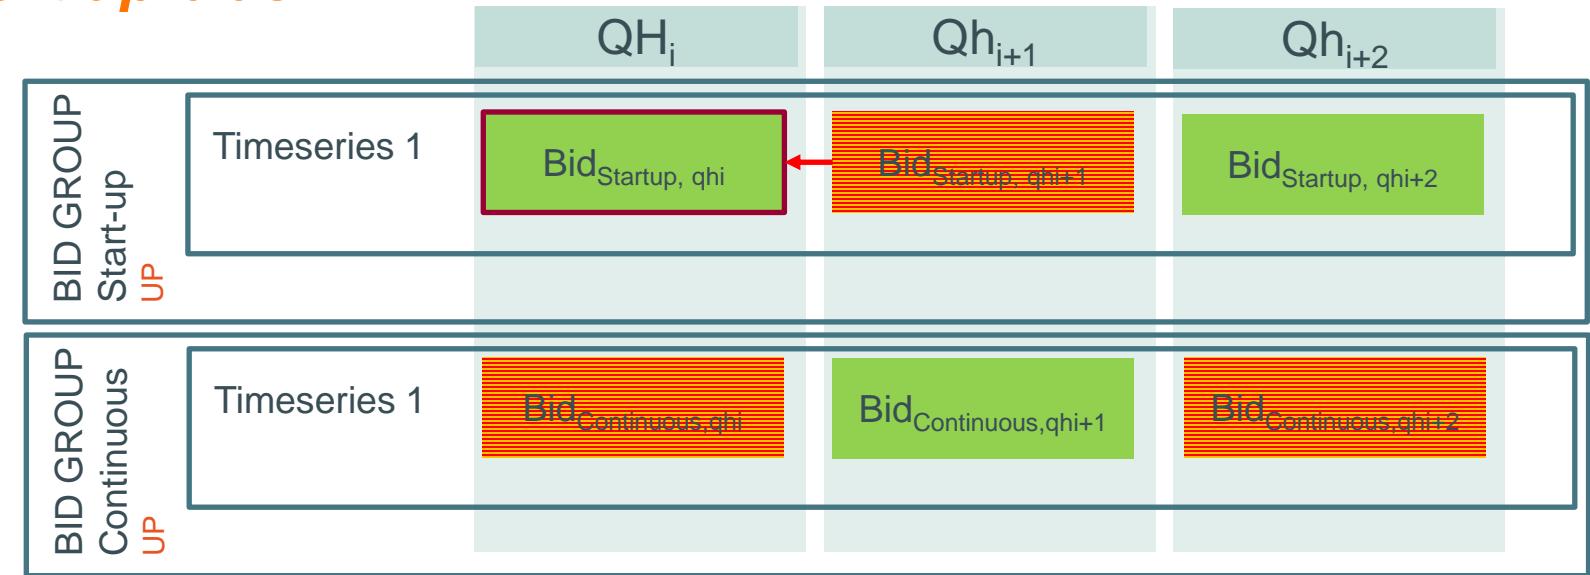

## CONDITIONAL LINKING

### *Example of a start-up – start-up bids*

DP is not running

**2 Bid Groups** to reflect start-ups:

- **Start-up** bids
  - initially **available**
  - Becomes **unavailable** if  $\text{Bid}_{\text{Startup}, q_{h-1}}$  is activated: **A55 link**
- **Continuous** bid is
  - initially **unavailable**

#### Legend:

Bid  
**available** for  
selection and  
activation

Bid selected / activated

Bid  
**unavailable**  
for selection  
and activation

## CONDITIONAL LINKING

### *Example of a start-up – start-up bids*

DP is not running

**2 Bid Groups** to reflect start-ups:

- **Start-up bids**
  - initially **available**
  - Becomes **unavailable** if  $\text{Bid}_{\text{Startup}, qh-1}$  is activated: **A55 link**
  - Becomes **unavailable** if  $\text{Bid}_{\text{Continuous}, qh-1}$  is activated: **A55 link**
- **Continuous bid** is
  - initially **unavailable**

		QH <sub>i</sub>	Qh <sub>i+1</sub>	Qh <sub>i+2</sub>
BID GROUP Start-up UP	Timeseries 1	Bid <sub>Startup, qhi</sub>	Bid <sub>Startup, qhi+1</sub>	Bid <sub>Startup, qhi+2</sub>
BID GROUP Continuous UP	Timeseries 1	Bid <sub>Continuous, qhi</sub>	Bid <sub>Continuous, qhi+1</sub>	Bid <sub>Continuous, qhi+2</sub>

#### Legend:

Bid  
**available** for  
selection and  
activation

Bid selected  
**/ activated**

Bid  
**unavailable**  
for selection  
and activation

## CONDITIONAL LINKING

### *Example of a start-up – initial situation*

DP is not running

**2 Bid Groups** to reflect start-ups:

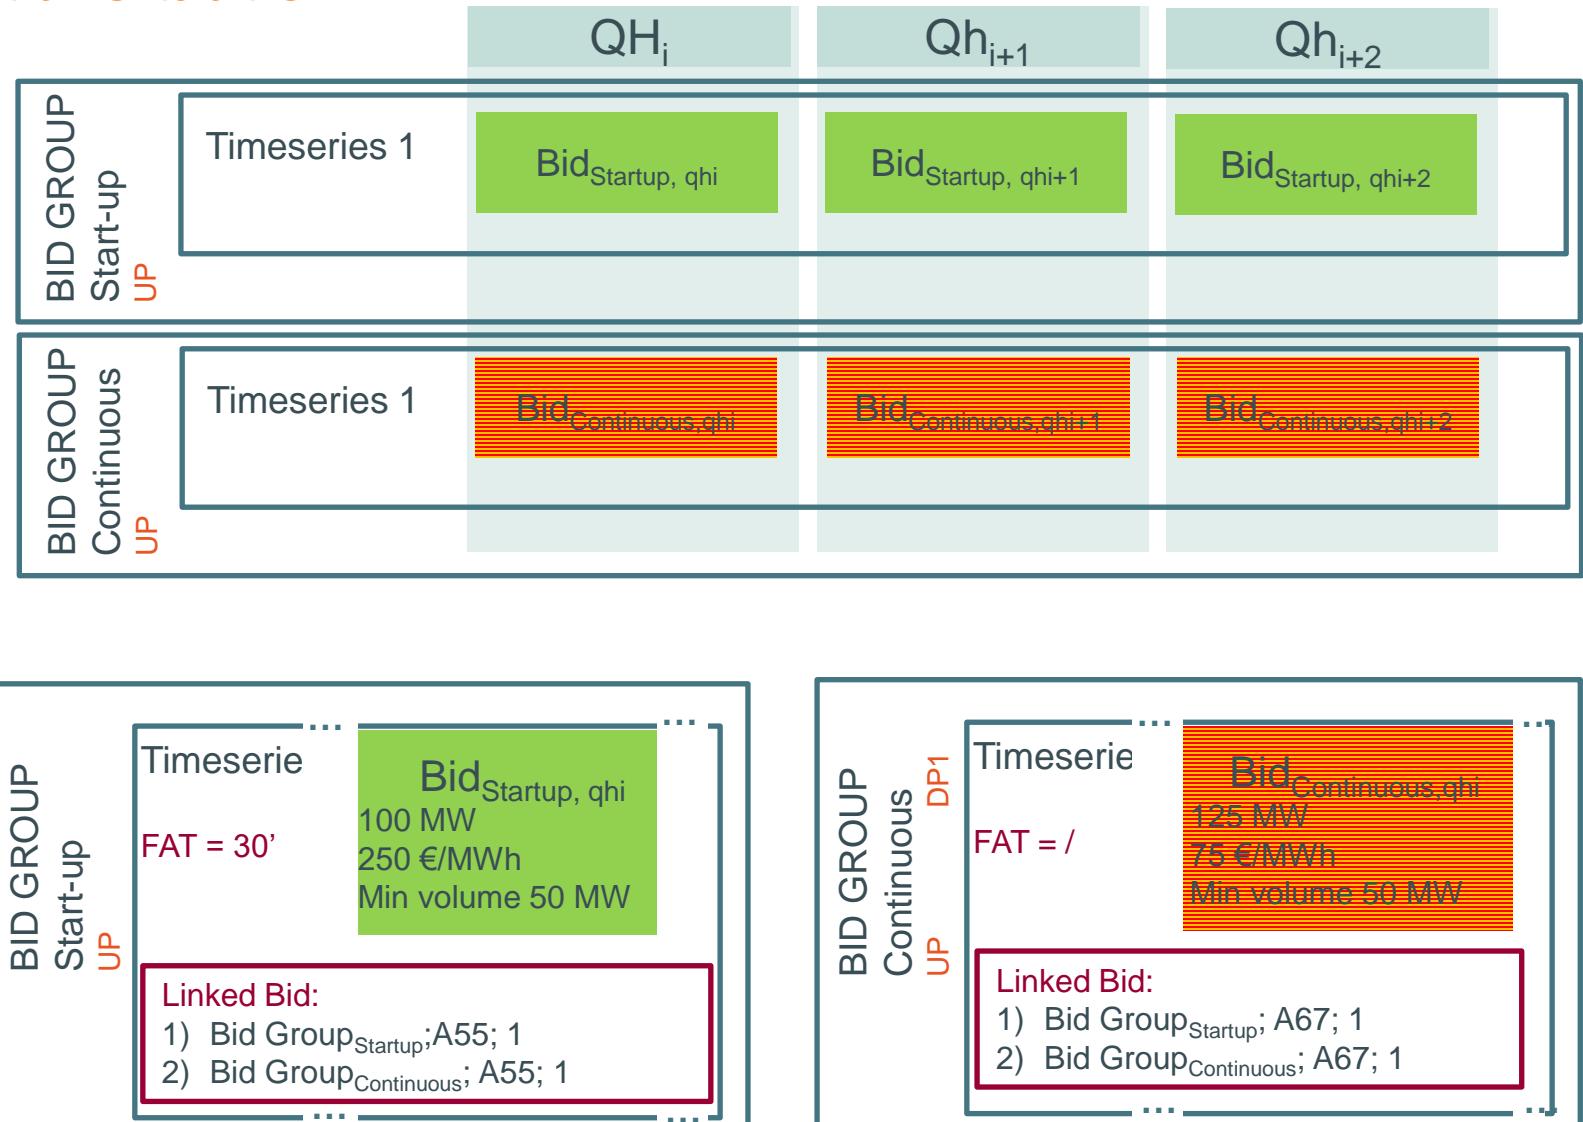

- **Start-up bids**
  - initially **available**
  - Becomes **unavailable** if  $\text{Bid}_{\text{Startup}, qh-1}$  is activated: **A55 link**
  - Becomes **unavailable** if  $\text{Bid}_{\text{Continuous}, qh-1}$  is activated: **A55 link**
- **Continuous bid**
  - is initially **unavailable**
  - Becomes available if  $\text{Bid}_{\text{Startup}, qh-1}$  is activated: **A67 link**
  - Or Becomes available if  $\text{Bid}_{\text{Continuous}, qh-1}$  is activated: **A67 link**

Legend:

Bid **available** for selection and activation

Bid selected / activated

Bid **unavailable** for selection and activation

## CONDITIONAL LINKING

### *Example of a start-up – at selection/activation*

DP is not running

**2 Bid Groups** to reflect start-ups:

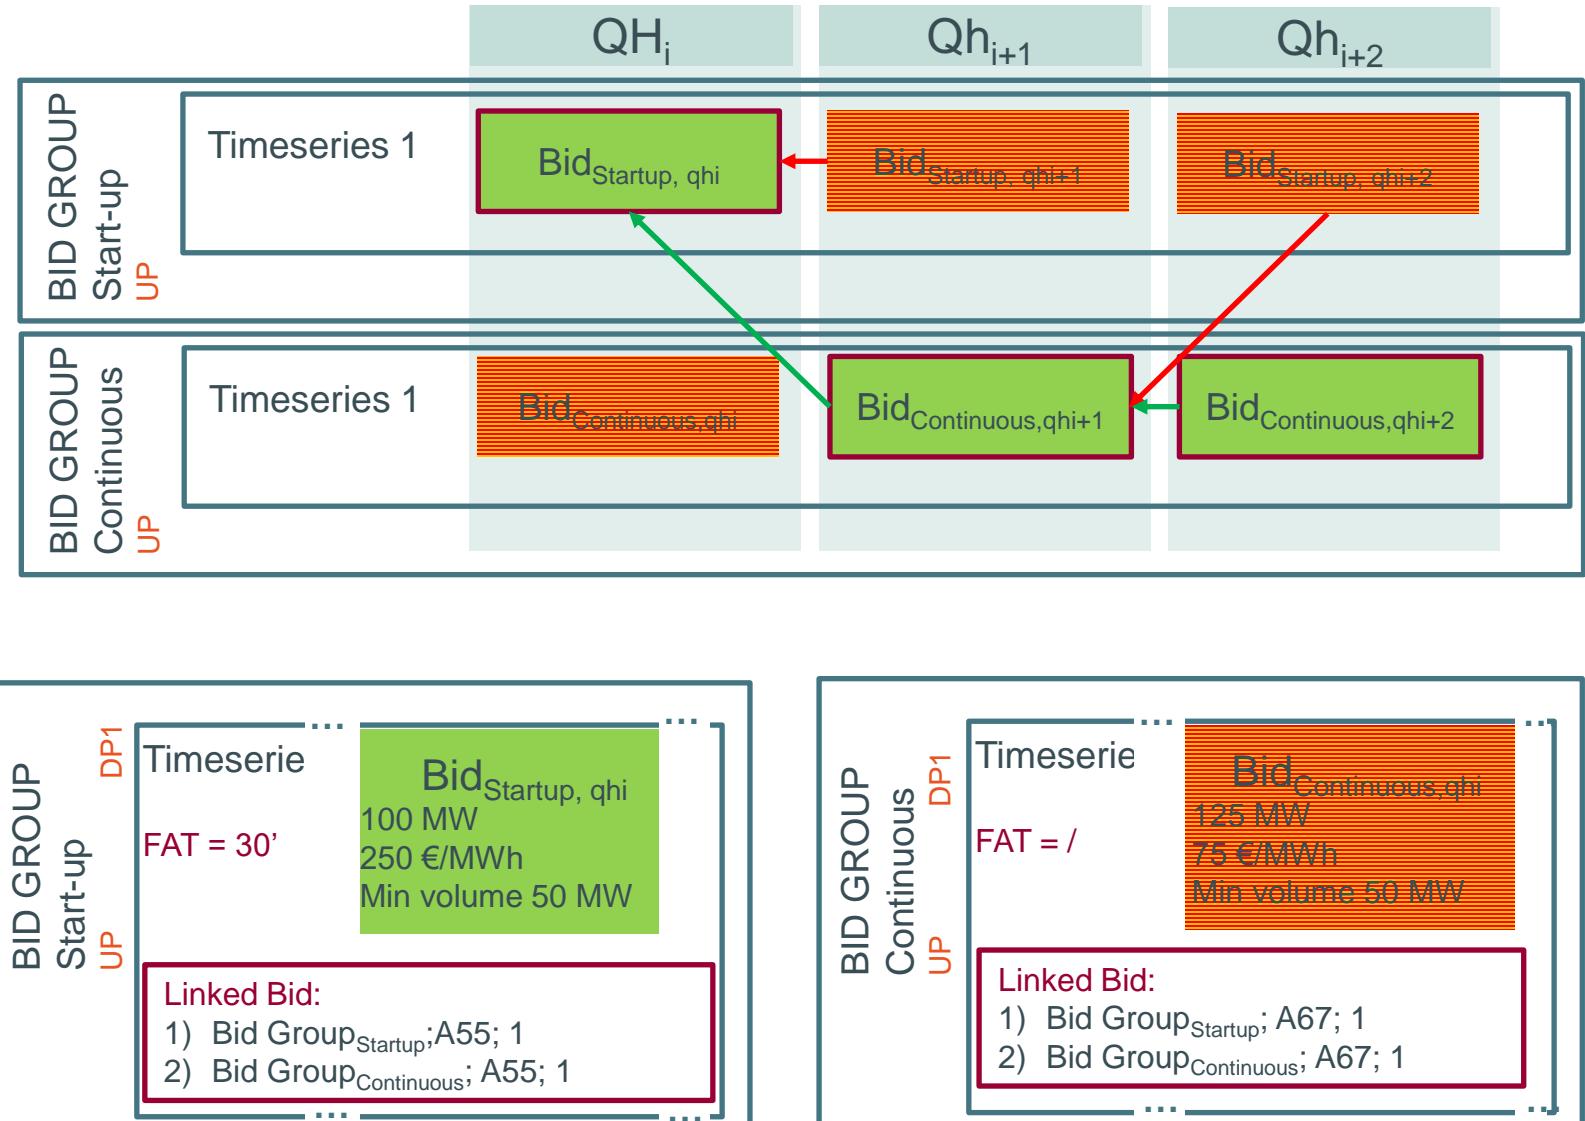

- **Start-up bids**
  - initially **available**
  - FAT is used to reflect start-up time
  - Becomes **unavailable** if  $\text{Bid}_{\text{Startup}, qh-1}$  is activated: **A55 link**
  - Becomes **unavailable** if  $\text{Bid}_{\text{Continuous}, qh-1}$  is activated: **A55 link**
- **Continuous bid**
  - is initially **unavailable**
  - Becomes available if  $\text{Bid}_{\text{Startup}, qh-1}$  is activated: **A67 link**
  - Or Becomes available if  $\text{Bid}_{\text{Continuous}, qh-1}$  is activated: **A67 link**

Legend:

Bid **available** for selection and activation

Bid selected / activated

Bid **unavailable** for selection and activation

## CONDITIONAL LINKING

### *Example of a start-up with Minimum Activation Time (MIT)*

DP is not running

**2 Bid Groups** to reflect start-ups:

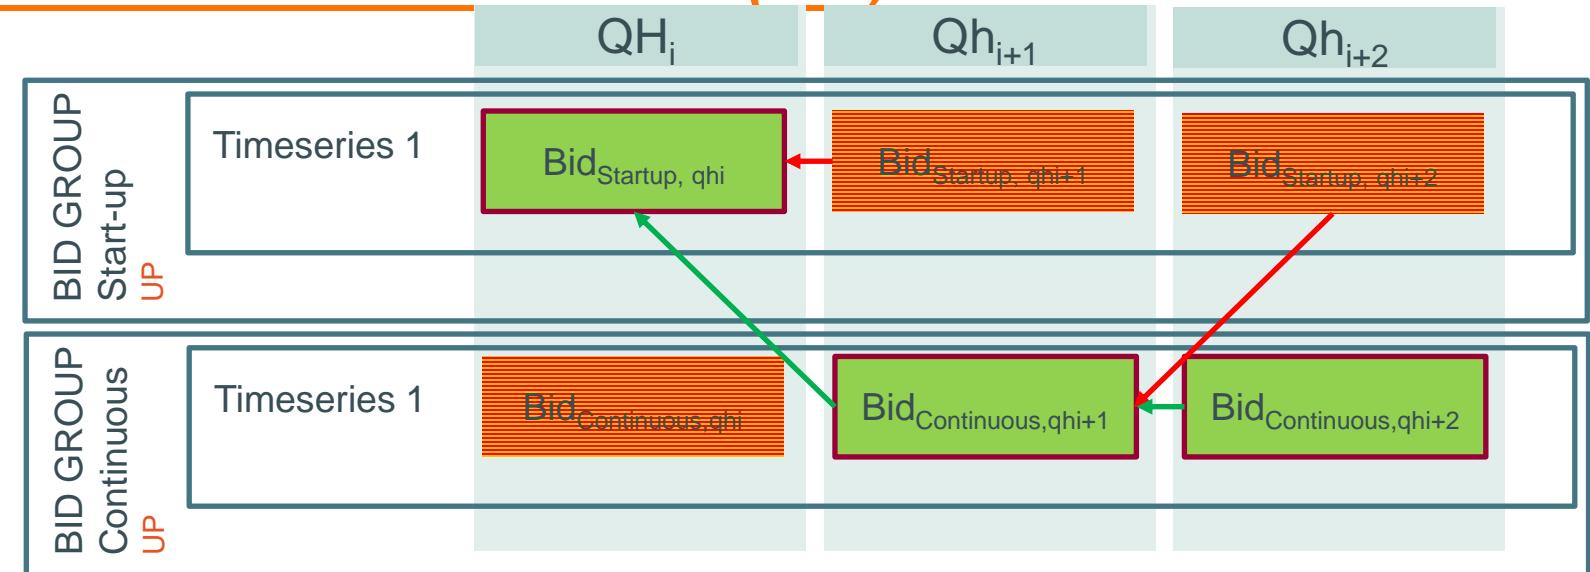

- **Start-up bids**
  - initially **available**
  - Becomes **unavailable** if  $\text{Bid}_{\text{Startup}, qh-1}$  is activated: **A55 link**
  - Becomes **unavailable** if  $\text{Bid}_{\text{Continuous}, qh-1}$  is activated: **A55 link**
- **Continuous bid**
  - is initially **unavailable**
  - **Has a MIT**
  - Becomes available if  $\text{Bid}_{\text{Startup}, qh-1}$  is activated: **A67 link**
  - Or Becomes available if  $\text{Bid}_{\text{Continuous}, qh-1}$  is activated: **A67 link**

Legend:

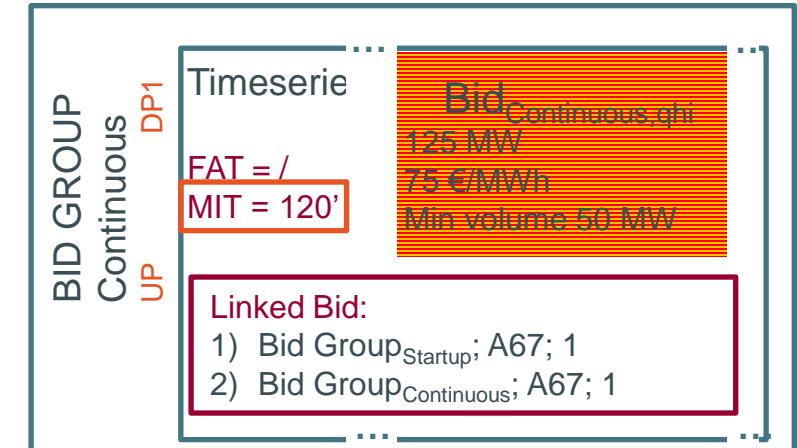

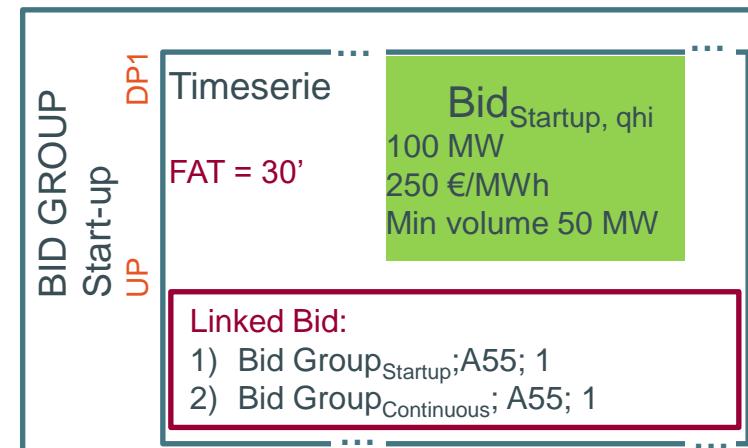

Bid **available** for selection and activation

Bid selected / activated

Bid **unavailable** for selection and activation

Elia guarantees that the continuous bid will always be activated if the start bid is activated

## CONDITIONAL LINKING

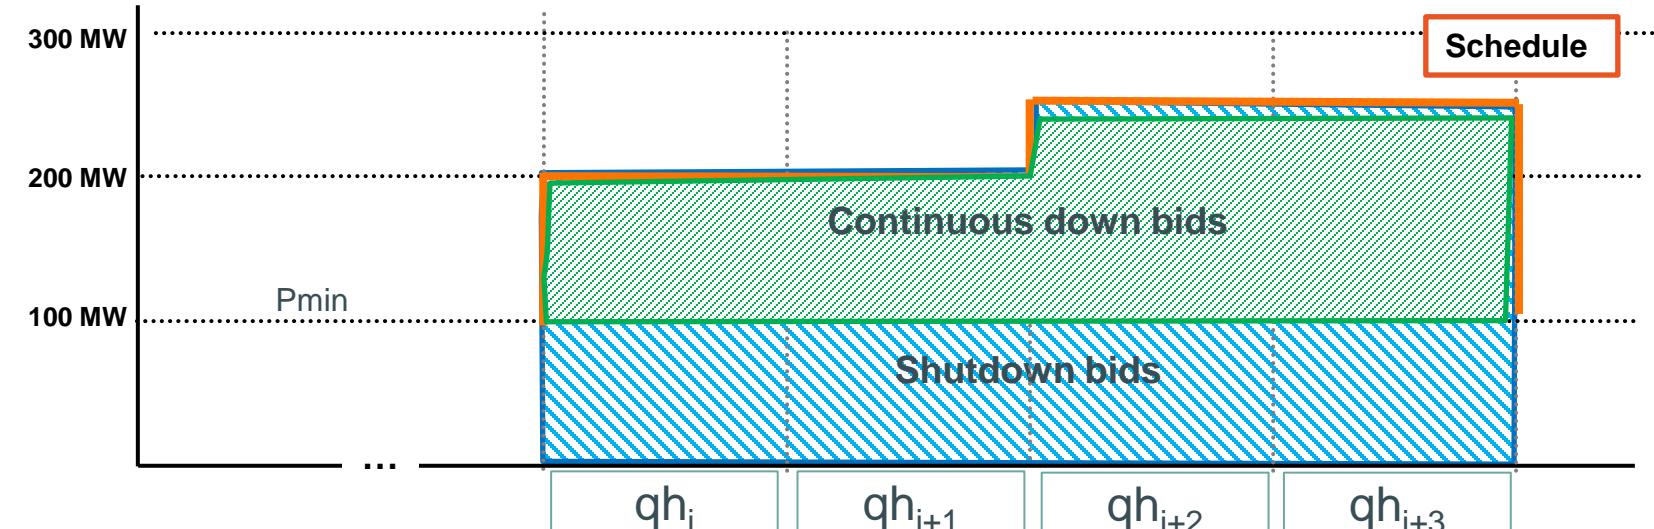

### *Example of a shut-down*

DP is running

$P_{min} = 100 \text{ MW}$

**2 Bid Groups** to reflect shut-down:

- **Continuous down bids**
  - initially **available**
  - Volume from Schedule to  $P_{min}$
  - Exclusive Group: EG1
  - Becomes **unavailable** if Bid<sub>Shutdown, qh-1</sub> is activated
- **Shutdown bid**
  - is initially **unavailable**
  - **Volume from Schedule to 0 MW**
  - **Minimum volume = maximum volume**
  - Exclusive Group: EG1
  - Becomes available if Bid<sub>Continuous down, qh-1</sub> is activated
  - Or Becomes available if Bid<sub>Shutdown, qh-1</sub> is activated

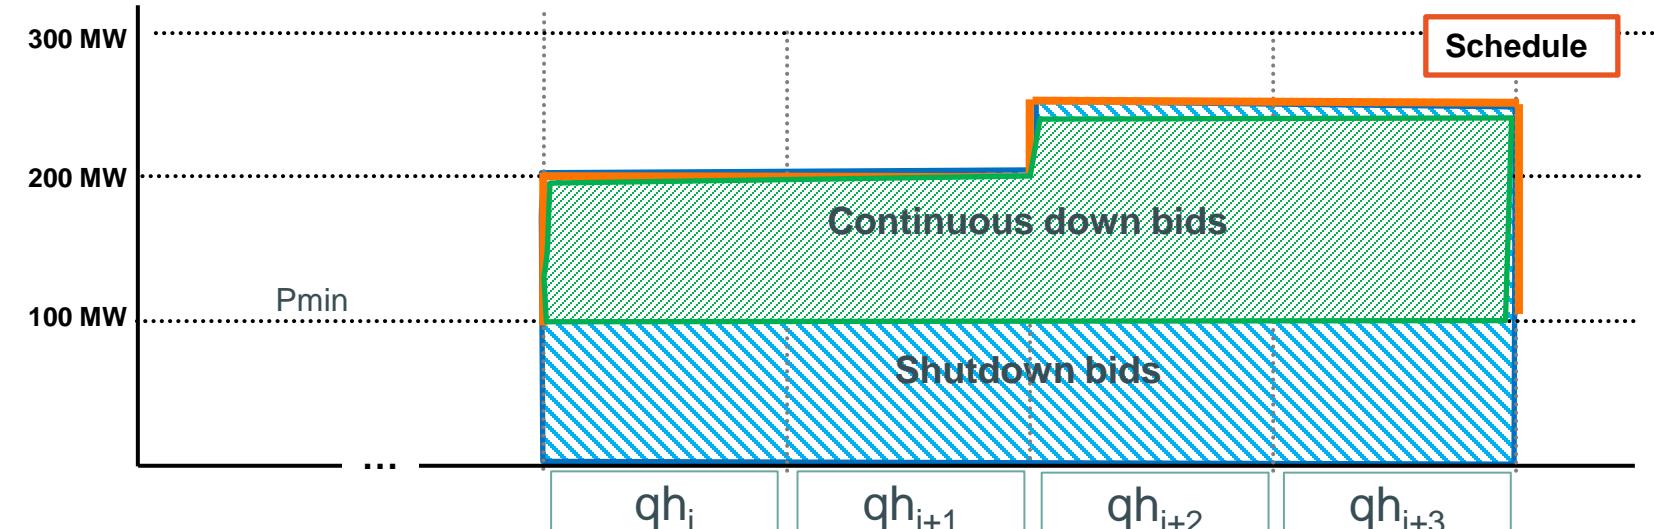

## CONDITIONAL LINKING

### ***Example of a shut-down with Minimum Activation Time (MIT) 1/3***

DP is running  
 $P_{min} = 100 \text{ MW}$

**2 Bid Groups** to reflect shut-down:

- **Continuous down bids**
  - initially **available**
  - Volume from Schedule to  $P_{min}$
  - Exclusive Group: EG1
  - Becomes **unavailable** if Bid<sub>Shutdown, qh-1</sub> is activated
- **Shutdown bid**
  - is initially **unavailable**
  - **Volume from Schedule to 0 MW**
  - **Has a MIT\***
  - **Minimum volume = maximum volume**
  - Exclusive Group: EG1
  - Becomes available if Bid<sub>Continuous down, qh-1</sub> is activated
  - Or Becomes available if Bid<sub>Shutdown, qh-1</sub> is activated

\*could also have a MAT

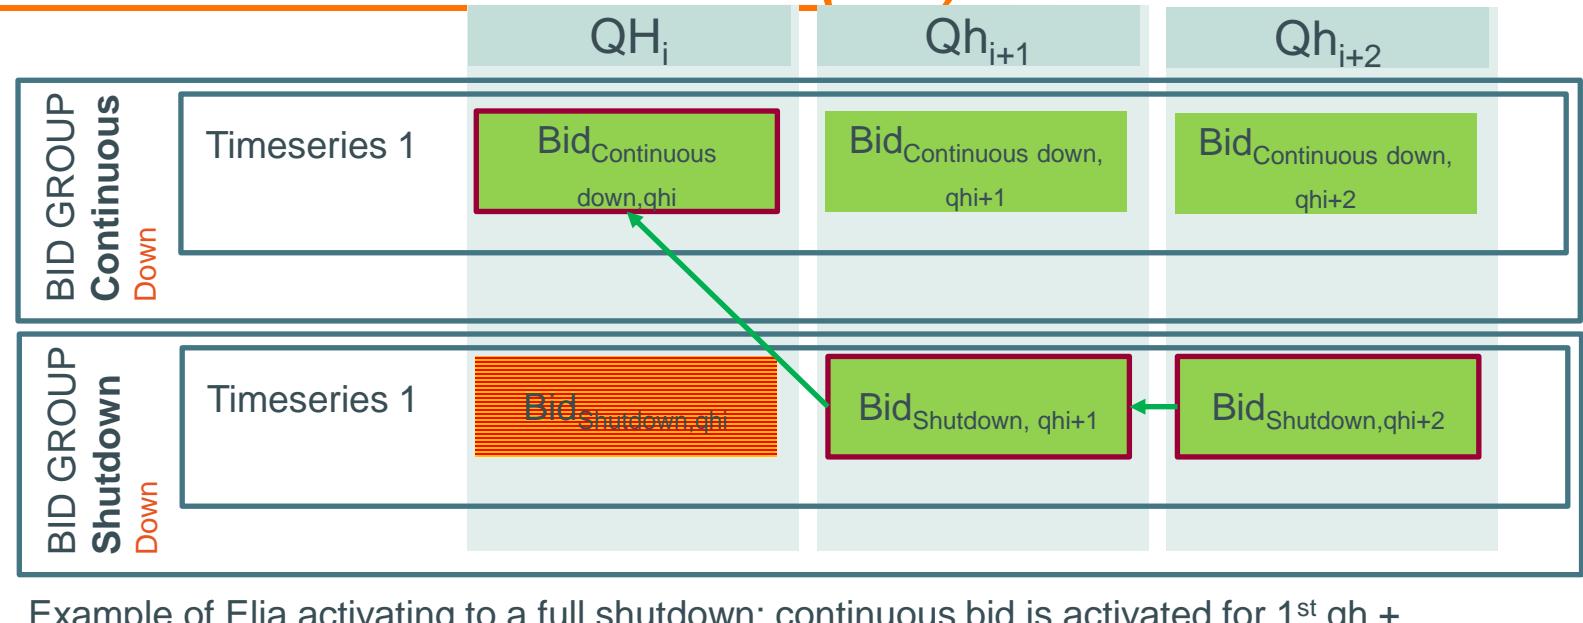

## CONDITIONAL LINKING

### *Example of a shut-down with Minimum Activation Time (MIT) 2/3*

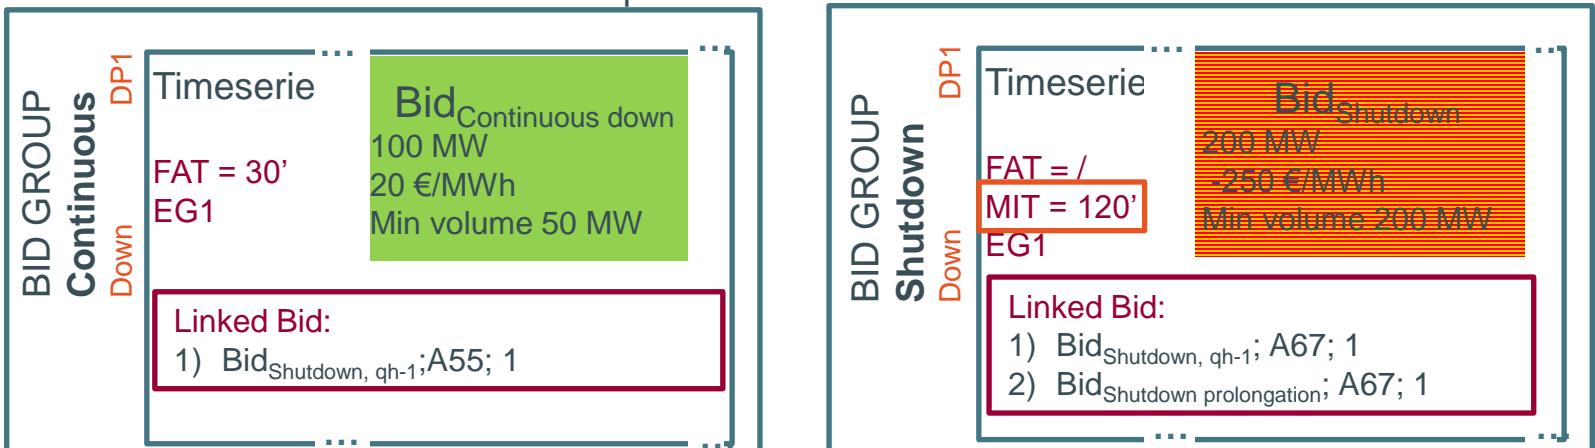

DP is running  
 $P_{min} = 100 \text{ MW}$

**2 Bid Groups** to reflect shut-down:

- **Continuous down bids**
  - initially **available**
  - Volume from Schedule to  $P_{min}$
  - Exclusive Group: EG1
  - Becomes **unavailable** if  $\text{Bid}_{\text{Shutdown}, qh-1}$  is activated: **A55 link**
- **Shutdown bid**
  - is initially **unavailable**
  - **Volume from Schedule to 0 MW**
  - **Has a MIT\***
  - **Minimum volume = maximum volume**
  - Exclusive Group: EG1
  - Becomes available if  $\text{Bid}_{\text{Continuous down}, qh-1}$  is activated: **A67 link**
  - Or Becomes available if  $\text{Bid}_{\text{Shutdown}, qh-1}$  is activated: **A67 link**

Example of Elia activating to a full shutdown: continuous bid is activated for 1<sup>st</sup> qh + shutdown bid is activated from 2<sup>nd</sup> qh to the end time of activation

\*could also have a MAT

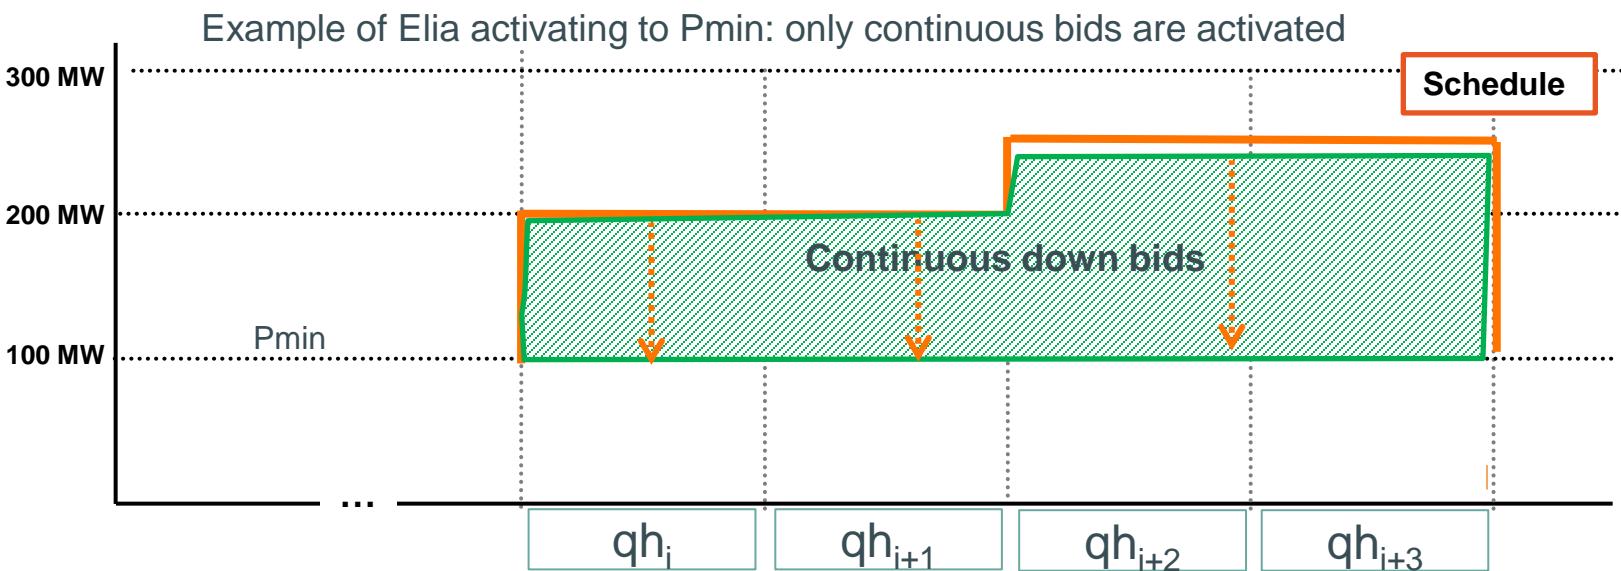

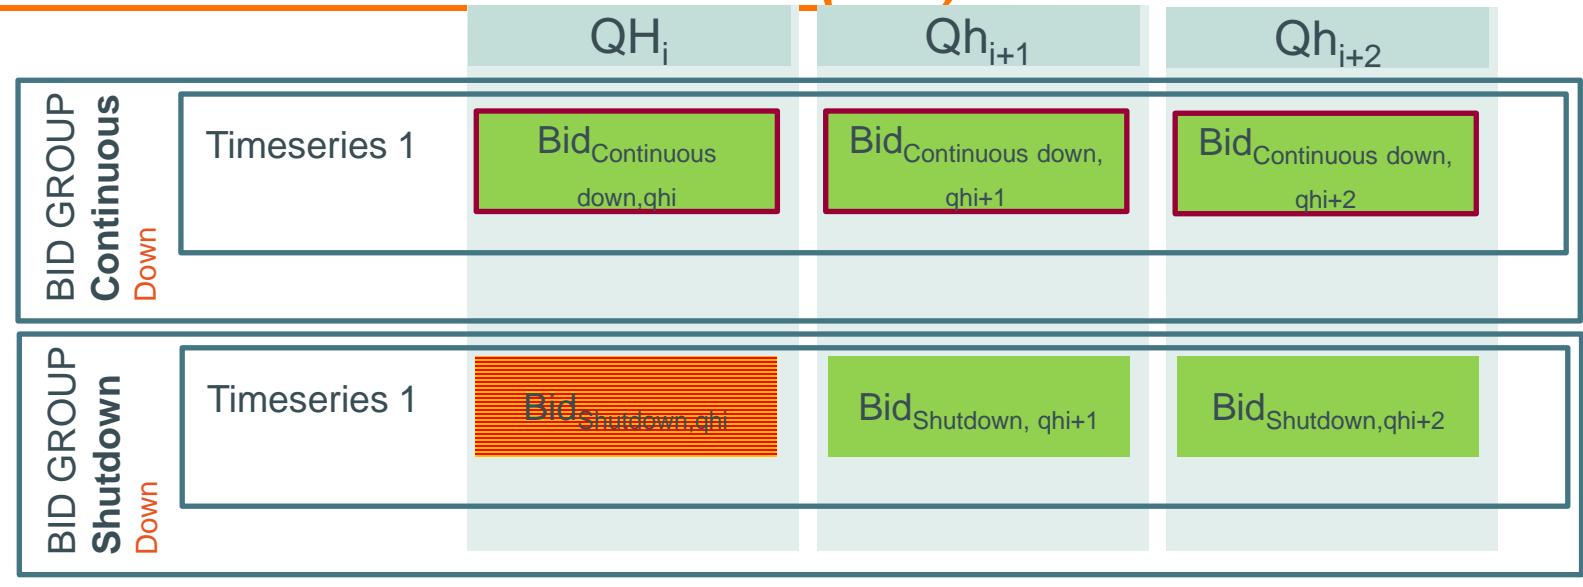

## CONDITIONAL LINKING

### *Example of a shut-down with Minimum Activation Time (MIT) 3/3*

DP is running  
 $P_{min} = 100 \text{ MW}$

**2 Bid Groups** to reflect shutdown:

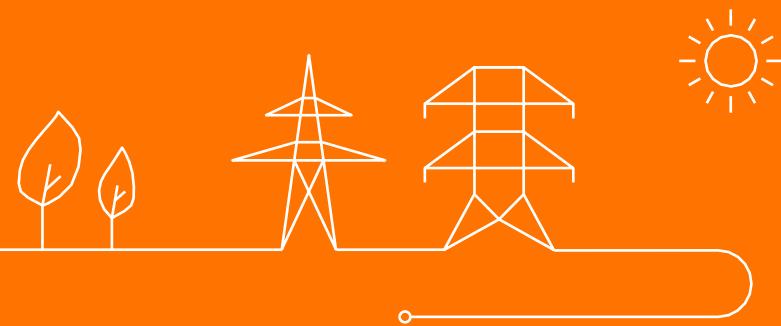

- **Continuous down** bids
  - initially **available**
  - Volume from Schedule to  $P_{min}$
  - Exclusive Group: EG1
  - Becomes **unavailable** if  $\text{Bid}_{\text{Shutdown, qh-1}}$  is activated: **A55 link**
- **Shutdown** bid
  - is initially **unavailable**
  - **Volume from Schedule to 0 MW**
  - **Has a MIT\***
  - **Minimum volume = maximum volume**
  - Exclusive Group: EG1
  - Becomes available if  $\text{Bid}_{\text{Continuous down, qh-1}}$  is activated: **A67 link**
  - Or Becomes available if  $\text{Bid}_{\text{Shutdown, qh-1}}$  is activated: **A67 link**

\*could also have a MAT

# How to offer flexibility for RD?

*Including combination with other products*

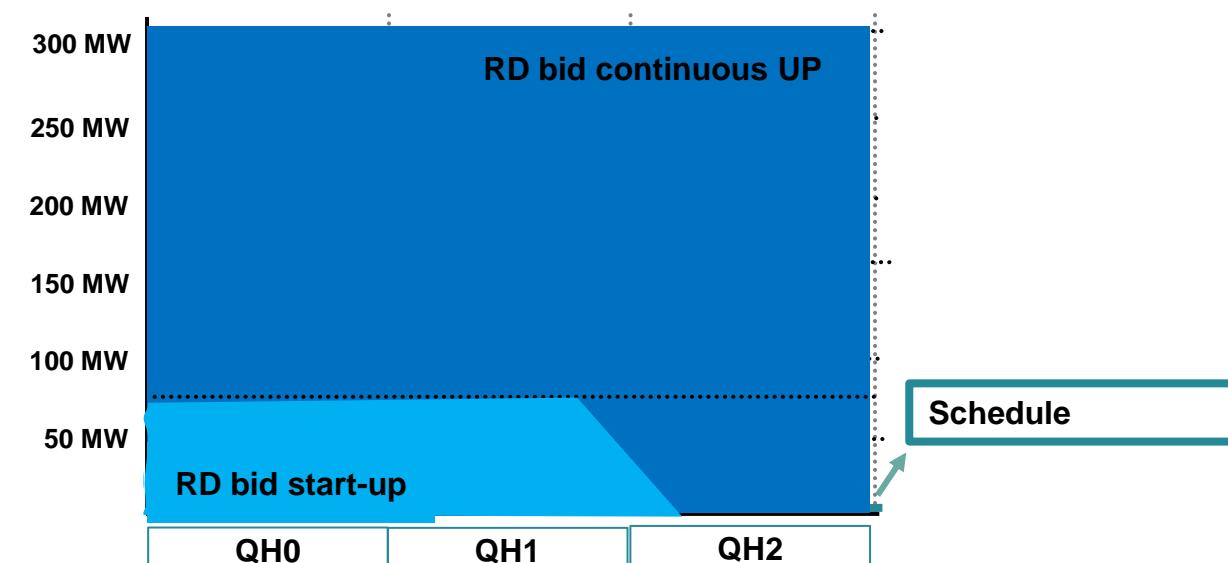

# HOW TO OFFER FLEXIBILITY FOR RD

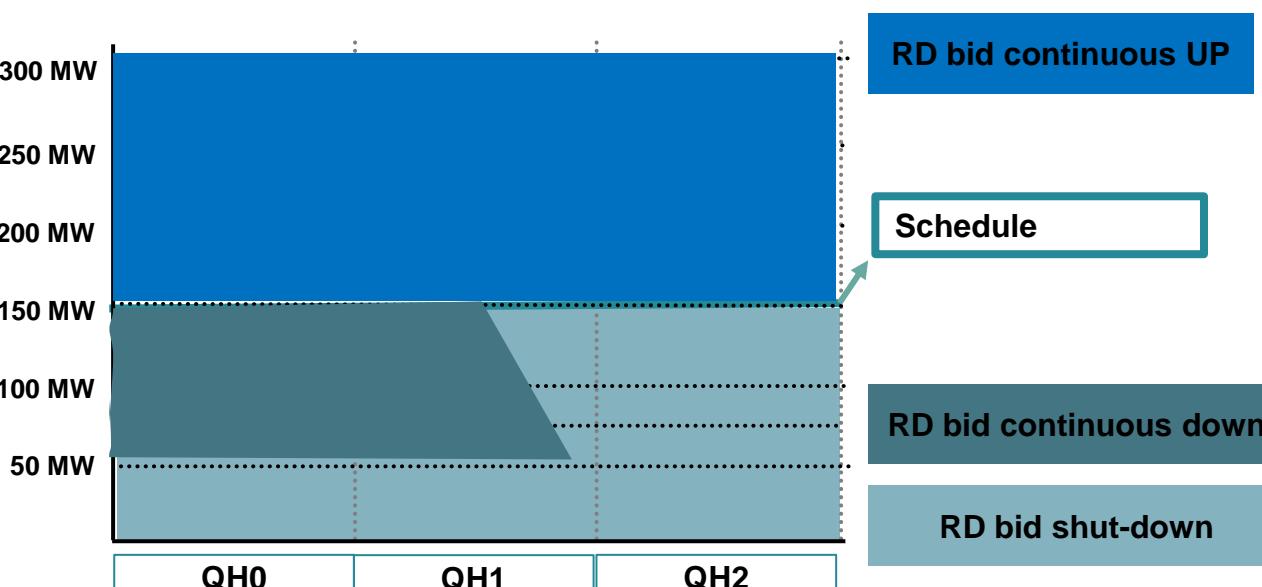

## *Start-up & Shutdown bids*

SA must bid a startup with RD bids (when technically feasible) when the DP is not running

SA must bid a full stop with RD bids (when technically feasible) when the DP is running

	Pmax	Pmin	Schedule
GT1	100 MW	30 MW	0 MW
GT2	100 MW	30 MW	0 MW
ST	100 MW	20 MW	0 MW

	Pmax	Pmin	Schedule
GT1	100 MW	30 MW	50 MW
GT2	100 MW	30 MW	50 MW
ST	100 MW	20 MW	50 MW

# HOW TO OFFER FLEXIBILITY FOR RD

## *Combination with contracted aFRR (1/4)*

	Pmax	Pmin	Schedule
GT1	100 MW	30 MW	50 MW
GT2	100 MW	30 MW	50 MW
ST	100 MW	20 MW	50 MW

SA must bid a full stop with RD bids also if he has an aFRR obligation on the asset

Elia guarantees that the aFRR contracted bid down will always be activated (purpose congestion) if the RD shutdown bids are activated to prevent unfeasible activations

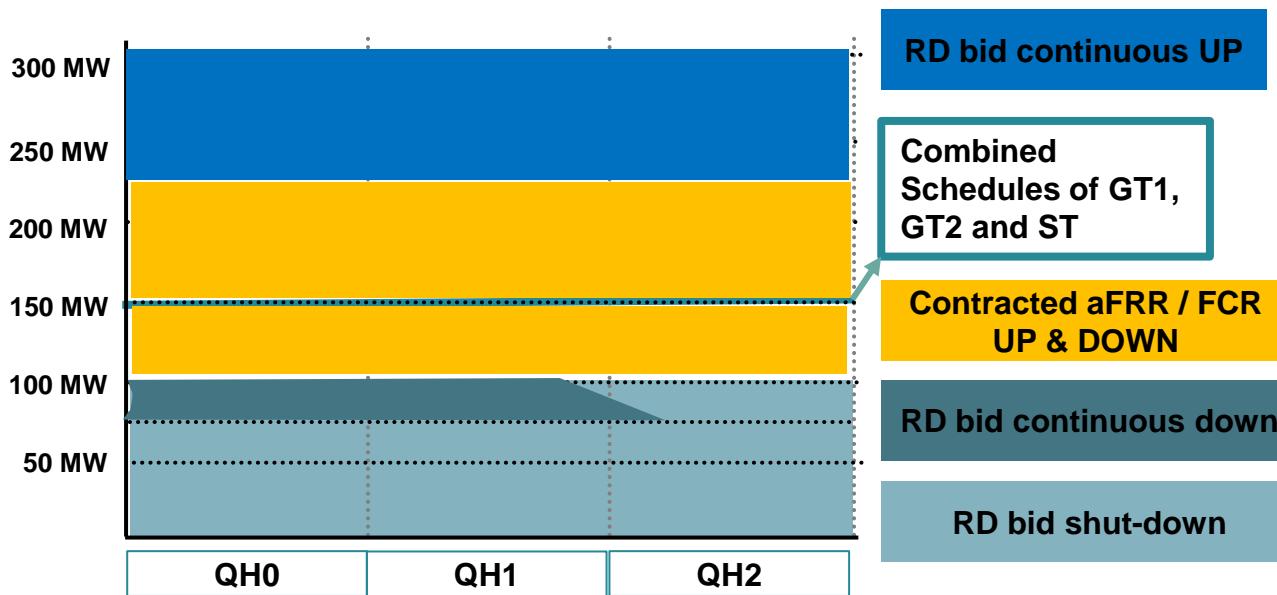

*In case contracted aFRR from Schedule to Pmin*

- **Shutdown bid**
  - is initially available
  - **Volume Pmin**
  - **Minimum volume = maximum volume**
  - Exclusive Group: EG1

# HOW TO OFFER FLEXIBILITY FOR RD

## *Combination with contracted aFRR (2/4)*

	Pmax	Pmin	Schedule
GT1	100 MW	30 MW	50 MW
GT2	100 MW	30 MW	50 MW
ST	100 MW	20 MW	50 MW

SA must bid a full stop with RD bids also if he has an aFRR obligation on the asset

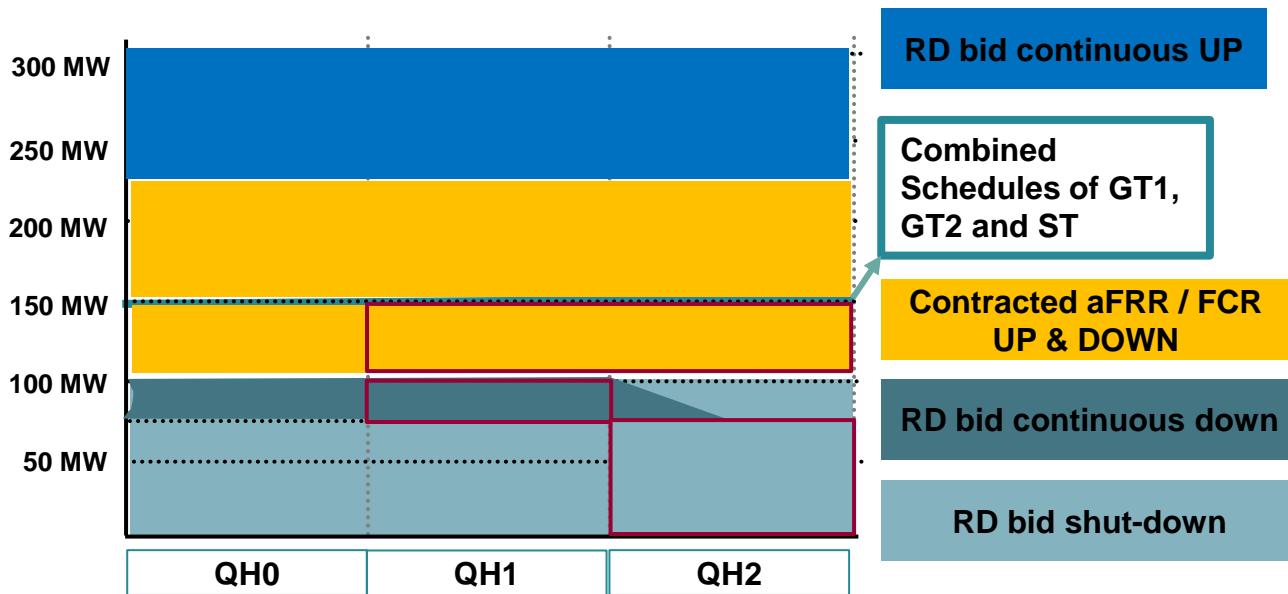

RD bids down have the same properties as standard shutdown (slide 25)

- **Continuous down bids**
  - initially available
  - Volume from Schedule - **contracted volume down (aFRR /FCR)** to Pmin Exclusive Group: EG1
  - Becomes unavailable if Bid<sub>Shutdown, qh-1</sub> is activated: **A55 link**
- **Shutdown bid**
  - is initially unavailable
  - **Volume from Schedule - contracted volume down (aFRR /FCR) to 0 MW**
  - Can have a FAT > 12,5 min
  - Can have a MIT
  - **Minimum volume = maximum volume**
  - Exclusive Group: EG1
  - Becomes available if Bid<sub>Continuous down, qh-1</sub> is activated: **A67 link**
  - Or Becomes available if Bid<sub>Shutdown, qh-1</sub> is activated: **A67 link**

# HOW TO OFFER FLEXIBILITY FOR RD

## *Combination with contracted aFRR (3/4)*

	Pmax	Pmin	Schedule
GT1	100 MW	30 MW	50 MW
GT2	100 MW	30 MW	50 MW
ST	100 MW	20 MW	50 MW

Elia guarantees that the aFRR contracted bid down will always be activated (purpose congestion) if the RD continuous down & the shutdown bids are activated to prevent unfeasible activations

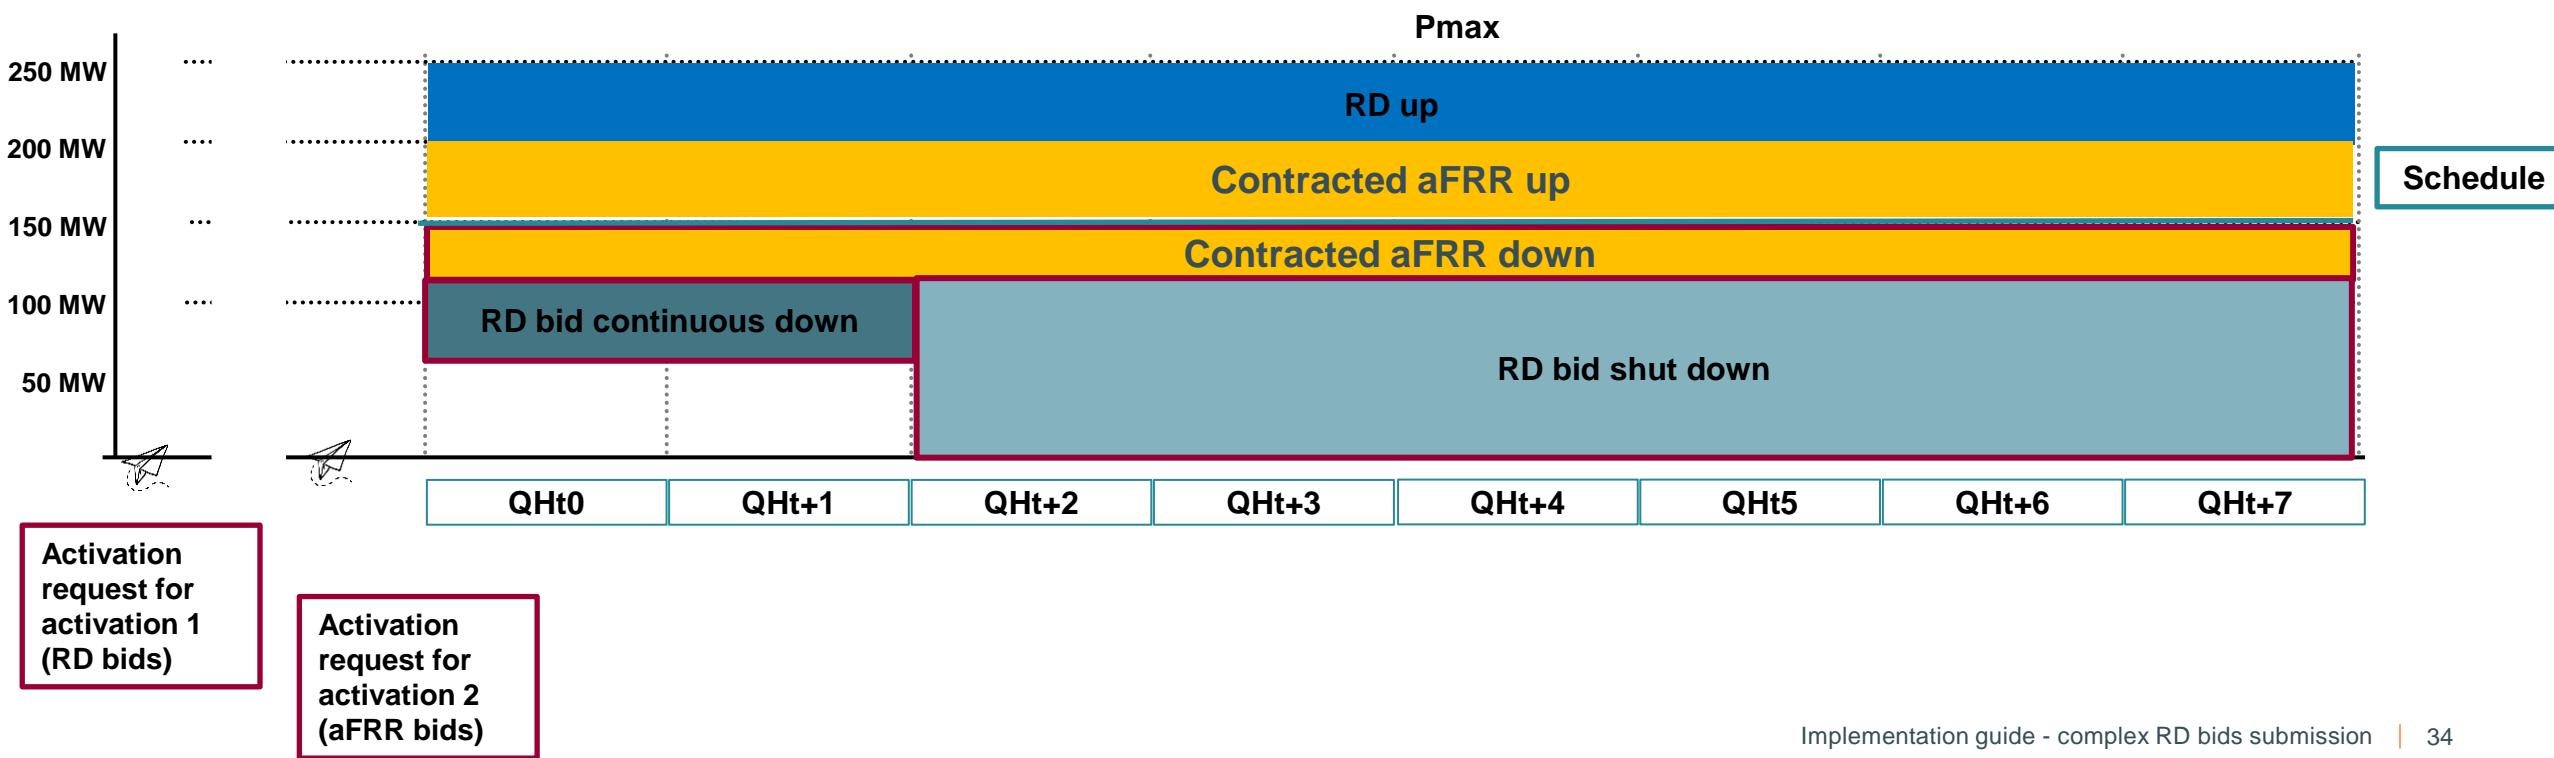

### Activations:

#### Timing

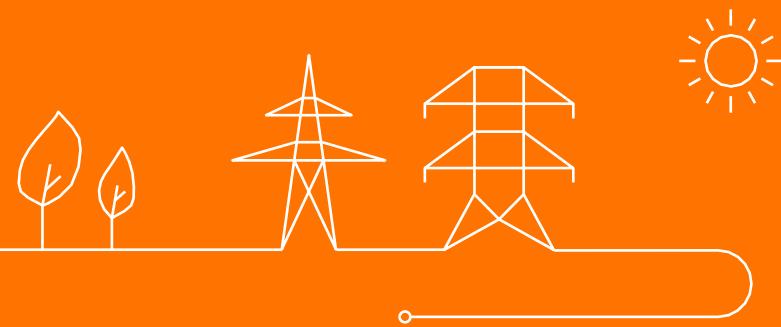

- RD activation including, RD continuous down & shutdown bids, will be sent according to the FAT
- Contracted aFRR activation will be sent at BAL GCT of the first qh of the activation

## HOW TO OFFER FLEXIBILITY FOR RD

### *Combination with contracted aFRR (4/4)*

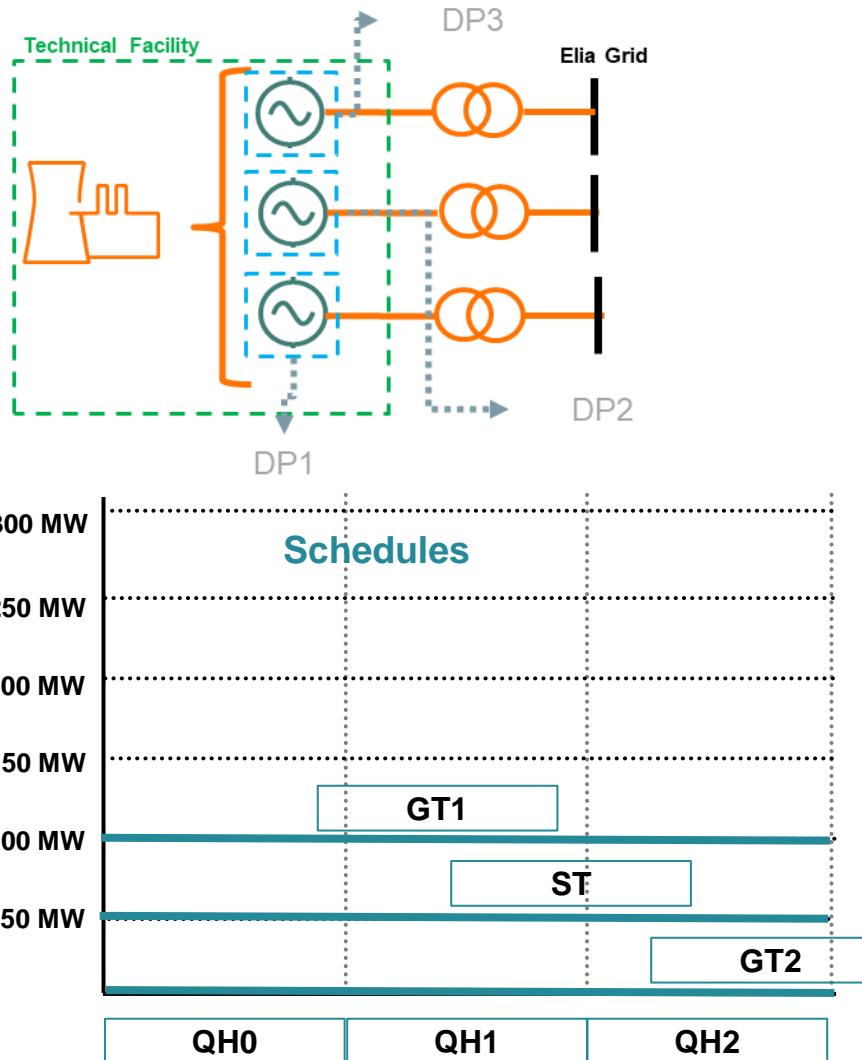

# Example of complex biddings

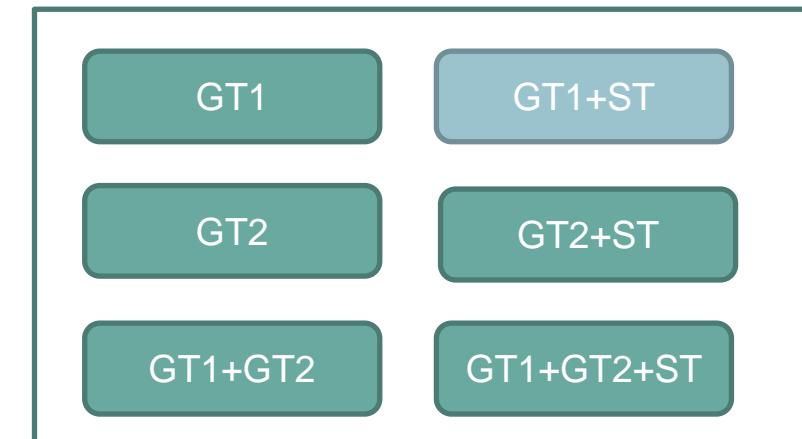

## EXAMPLE OF COMPLEX BIDDING

*Combination of Conditional links & Exclusive Groups to reflect Operating modes\**

**Hypothesis:**

- A CCGT with 3 DPs: GT1, GT2 & ST
- This CCGT can technically be operated in multiple Operating modes:

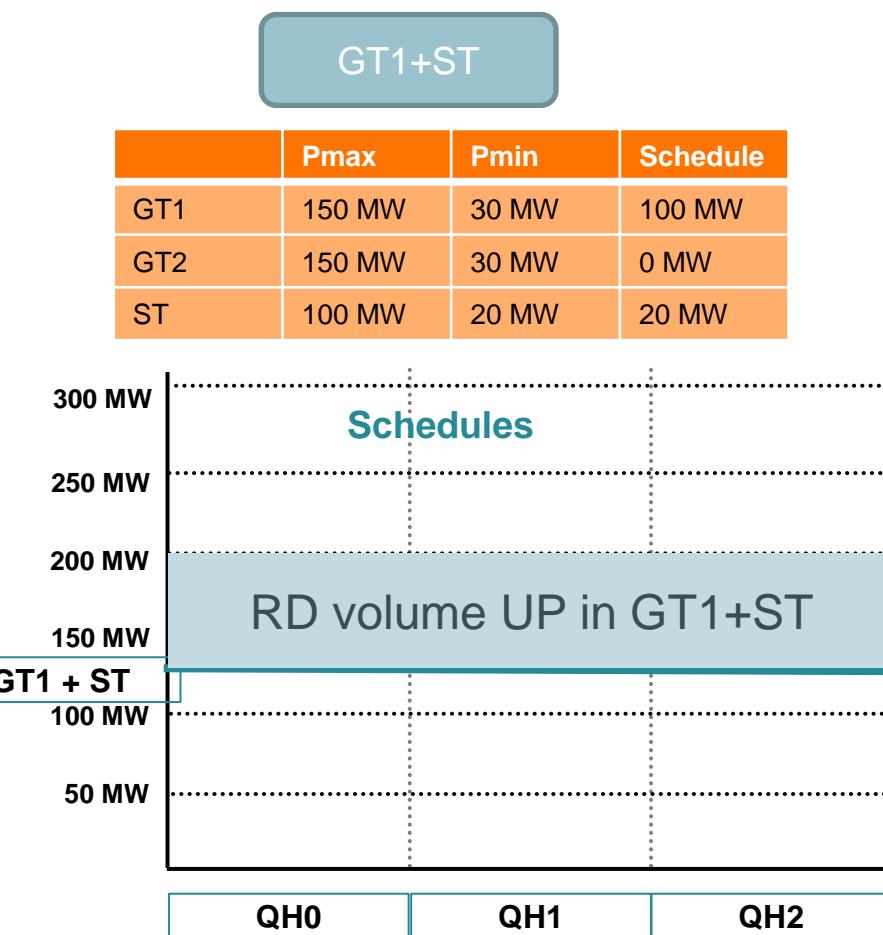

- Current operating mode is (GT1+ST)
- By using the combination of Conditional links and Exclusive Groups, the flexibility of the running operating mode and the all other operating mode can be submitted.

	Pmax	Pmin	Schedule
GT1	150 MW	30 MW	100 MW
GT2	150 MW	30 MW	0 MW
ST	100 MW	20 MW	50 MW

## EXAMPLE OF COMPLEX BIDDING

*Combination of Conditional links & Exclusive Groups to reflect Operating modes*

Current operating mode:

## EXAMPLE OF START-UP

**Combination of Conditional links & FAT to reflect slow start-ups**

BID GROUP	DP1	...
Start-up UP	<p>Timeserie</p> <p>FAT = 60'</p> <p>EG: /</p> <p><b>Bid<sub>qh0</sub></b> 50 MW 250 €/MWh Min Volume: 50 MW</p> <p><b>Bid<sub>qh96</sub></b> 50 MW 250 €/MWh Min Volume: 50 MW</p> <p><b>Linked Bid:</b> 1) Start-up up; A55; 1 2) Continuous up; A55; 1</p>	...
Continuous up UP	<p>Timeserie</p> <p>FAT = /</p> <p>EG: /</p> <p><b>Bid<sub>qh0</sub></b> 150 MW 150 €/MWh Min Volume: 30 MW</p> <p><b>Bid<sub>qh96</sub></b> 150 MW 150 €/MWh Min Volume: 30 MW</p> <p><b>Linked Bid:</b> 1) Start-up up; A67; 1 2) Continuous up; A67; 1</p>	...

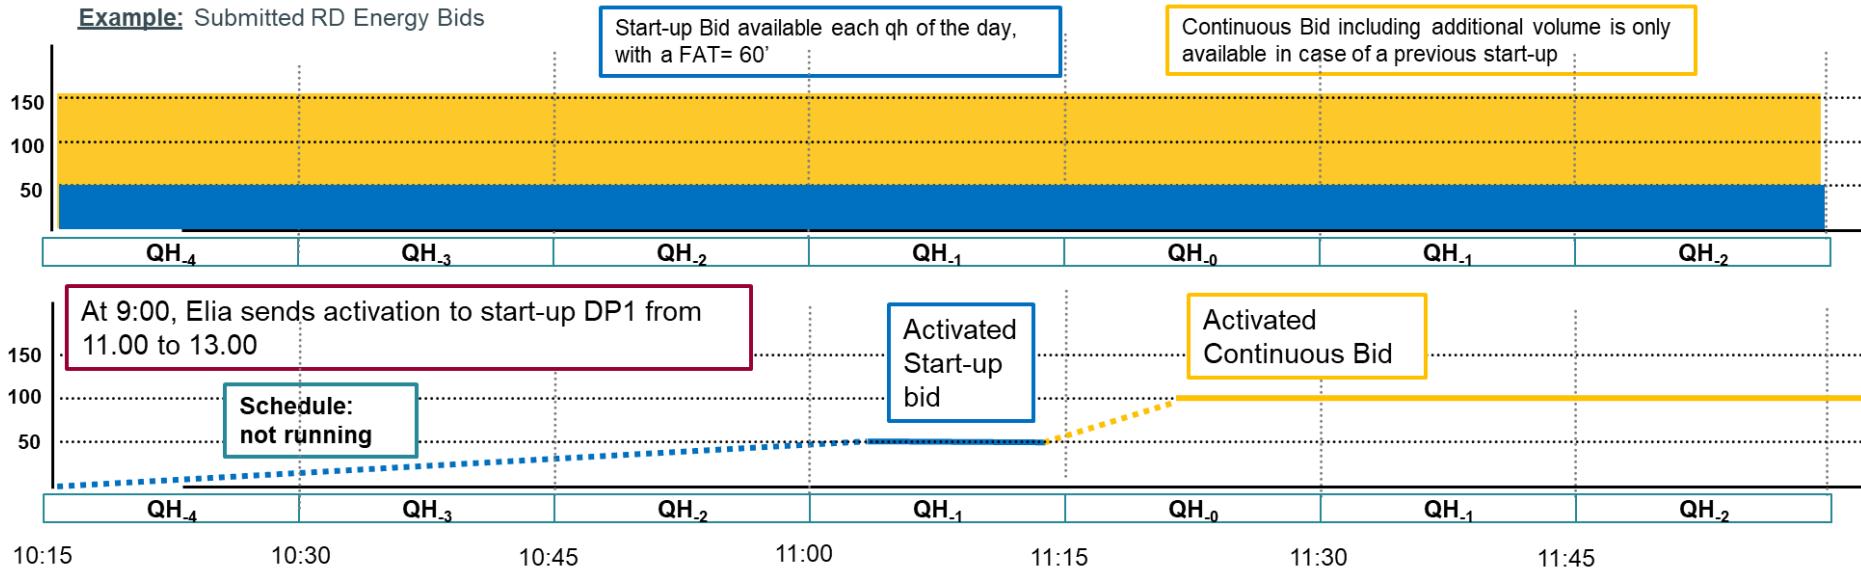

**Hypothesis:**

- 1 DP not running for the full day
- 2 Bid groups submitted
  - **Start-up bids**
    - initially available
    - Becomes unavailable if Bid<sub>Startup, qh-1</sub> or if Bid<sub>Continuous, qh-1</sub> is activated: **A55 link**
    - Includes a **FAT reflecting the ramp-up** of the start-up until Pmin (50 MW). FAT = 60'
  - **Continuous bid**
    - is initially unavailable
    - Becomes available if Bid<sub>Startup, qh-1</sub> or if Bid<sub>Continuous, qh-1</sub> **A55 link**
    - **FAT = 12,5'**

# EXAMPLE OF START-UP

## Combination of Conditional links & FAT to reflect slow start-ups

Example: Submitted RD Energy Bids

BID GROUP	Start-up UP	DP1
		Timeserie FAT = 60' EG: /
Bid <sub>qh-3</sub> 50 MW 250 €/MWh Min Vol: 50 MW		
Bid <sub>qh-2</sub> 50 MW 250 €/MWh Min Vol: 50 MW		
<b>Bid<sub>qh-1</sub></b> 50 MW 250 €/MWh Min Vol: 50 MW		
Bid <sub>qh0</sub> 50 MW 250 €/MWh Min Vol: 50 MW		
Bid <sub>qh1</sub> 50 MW 250 €/MWh Min Vol: 50 MW		
Bid <sub>qh2</sub> 50 MW 250 €/MWh Min Vol: 50 MW		
<b>Linked Bid:</b> 1) Start-up up; A55; 1 & 2) Continuous up; A55; 1		

BID GROUP	Continuous up UP	DP1
		Timeserie FAT = / EG: /
Bid <sub>qh-3</sub> 150 MW 150 €/MWh Min Vol: 50 MW		
Bid <sub>qh-2</sub> 150 MW 150 €/MWh Min Vol: 50 MW		
Bid <sub>qh-1</sub> 150 MW 150 €/MWh Min Vol: 50 MW		
Bid <sub>qh0</sub> 150 MW 150 €/MWh Min Vol: 50 MW		
Bid <sub>qh1</sub> 150 MW 150 €/MWh Min Vol: 50 MW		
Bid <sub>qh2</sub> 150 MW 150 €/MWh Min Vol: 50 MW		
<b>Linked Bid:</b> 1) Start-up up; A67; 1 & 2) Continuous up; A67; 1		

### Activation:

- At 9:00, Elia sends activation to start-up DP1 from 11:00 to 13:00
- Activated bids:
  - Start-up bid of qh<sub>-1</sub> (11:00 to 11:15)
  - Continuous bids from qh<sub>0</sub> to qh<sub>7</sub> (11:15 to 13:00)
- DP1 must reach 50 MW in qh<sub>-1</sub> and 100 MW in qh<sub>0</sub>

## COMPLEMENTARY INFORMATION

- ❑ [Link](#) to the Manual on Energy Bidding
- ❑ Bilateral implementation or testing session can be organized.
